CLAIM

The ornamental design for a display screen with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence for a display screen with animated graphical user interface; FIG. 2 is a front view of a second image thereof; and, FIG. 3 is a front view of a third image thereof.

The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1-3. The process or period in which an image transitions to another forms no part of the claimed design. The broken lines showings of the display screen, electronic device, text, and other features are environmental only and form no part of the claimed design. The remaining broken lines, including the closely spaced broken line showing of trees, facial features, heart-shaped features, thumbs-up features, emoji features, and emanating bubbles show portions of the graphical user interface that form no part of the claimed design.
