(57) **CLAIM**

The ornamental design for a teaching aid, as shown and described.

DESCRIPTION

The FIGURE is a front view of a teaching aid, showing our new design.
In the FIGURE, the teaching aid is made from a substantially flat substrate that has no appreciable thickness.
The broken line showing the teaching aid forms no part of the claimed design.

CLEANING PROCESS

Clean by Number.

Our clean-by-number process ensures consistency from room to room. A numbered microfiber booklet and "hot spot" map make it easy for your staff to follow. The result? Better cleaning, outcomes and throughput times.

PATIENT ROOM

1. Light switch/Room inner door knob
2. Call box/Button/Telephone
3. Bed rails/Controls
4. Bedside table handles
5. Tray table
6. Chair
7. Room sink

BATHROOM

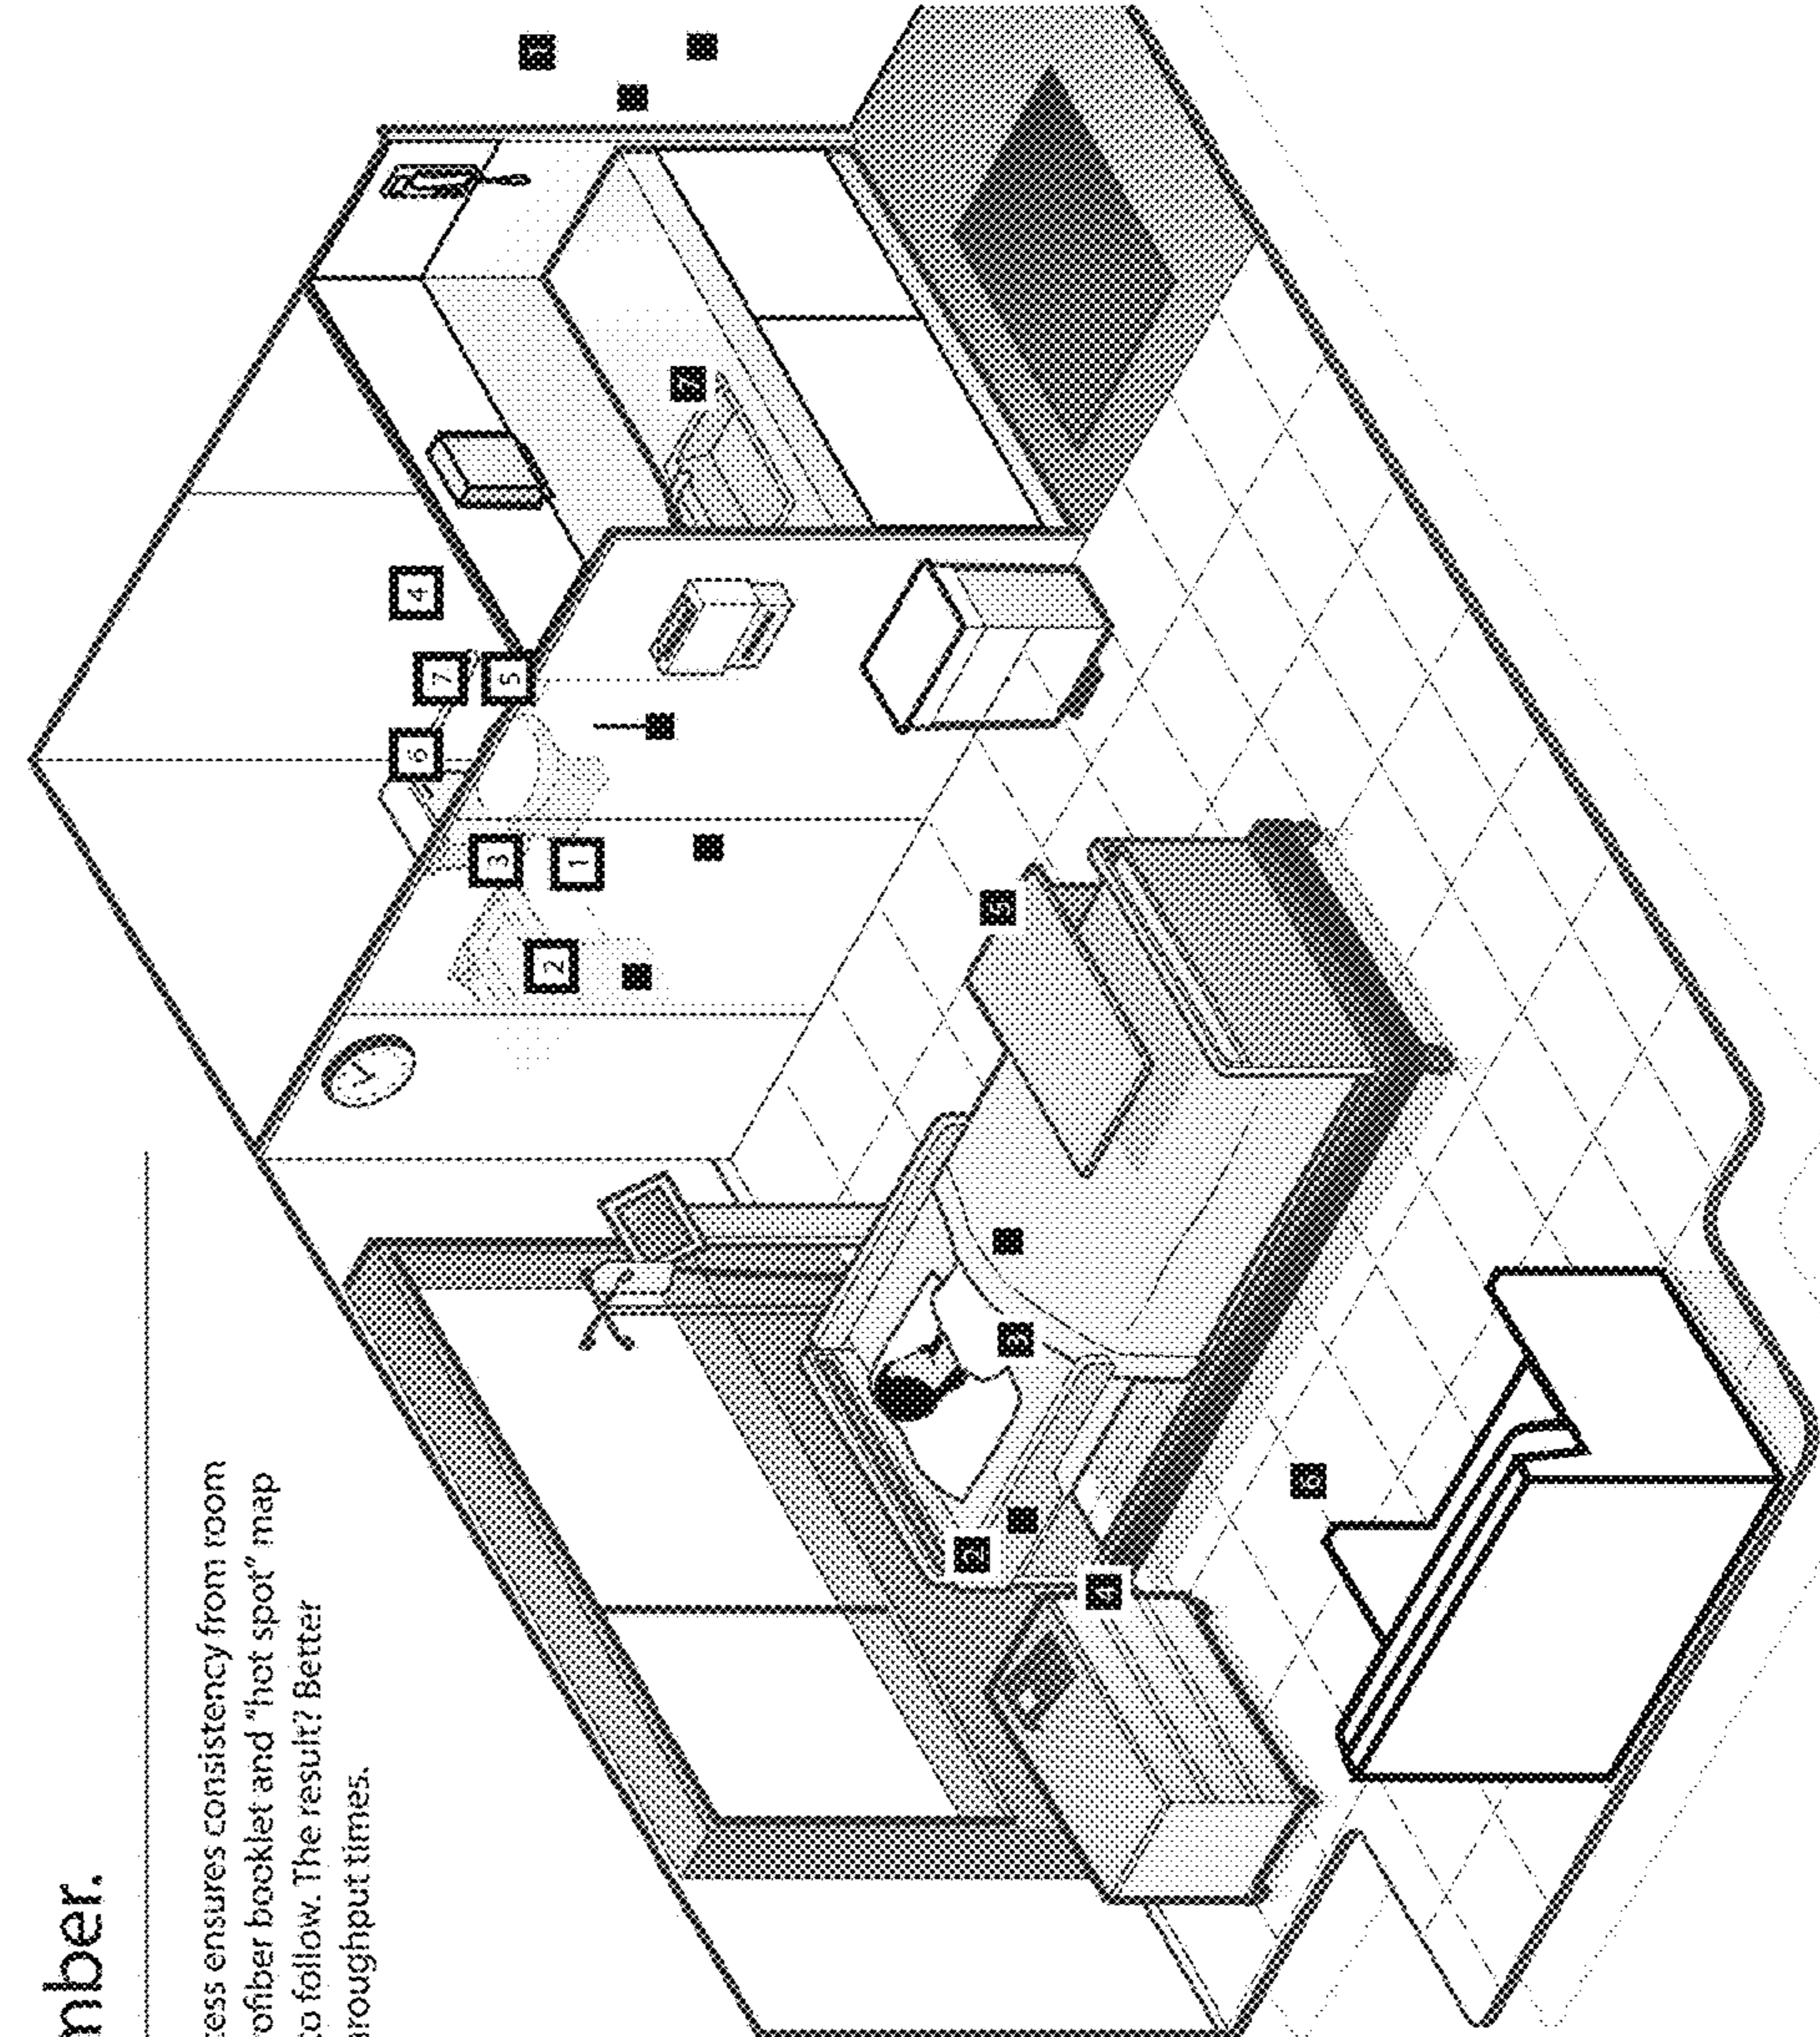

1. Bathroom inner door knob
2. Bathroom light switch
3. Bathroom sink
4. Bathroom handrails by toilet
5. Toilet bidpan cleaner
6. Toilet flush handle
7. Toilet seat

Point-of-Care Devices

Mobile and shared patient equipment are often overlooked in cleaning protocols. Germicidal wipes are an easy way to make sure these devices are frequently disinfected by caregivers.

Floors

Mop all floor surfaces with a microfiber mop, starting farthest from the door and moving towards the door. Use a new mop when cleaning the bathroom to avoid cross contamination.

REUSABLE CLEAN-BY-NUMBER MICROFIBER BOOKLET

Hospital staff often use the same cloth to clean the whole room—a cross contamination risk. Our numbered microfiber booklet ensures a separate cloth is used for each surface. The booklet comes in two colors: blue for the patient room, green for bathroom use only.

Surface to Clean
