(57) **CLAIM**

The ornamental design for a fender flare, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view showing top and front surfaces of a fender flare.

FIG. 2 is a perspective view showing bottom and rear surfaces thereof.

FIG. 3 is a front view thereof.

FIG. 4 is a rear view thereof.

FIG. 5 is a left side view thereof.

FIG. 6 is a right side view thereof.

FIG. 7 is a top view thereof; and,

FIG. 8 is a bottom view thereof.

The broken lines in the drawings illustrate portions of the fender flares that forms no part of the claimed design.

Certain features, such as fasteners, fastener holes, mounting structures, and cut-out logos are shown in broken lines and are disclaimed. However, any of such features could be claimed in an alternative embodiment. Furthermore, it is contemplated that portions of the fender flares or side steps presently claimed could be disclaimed. For example, in the fender flares of 1-8, any one or combination of the mounting plate, the fender portion or the supporting struts can be claimed or disclaimed. Rear surfaces of the fender flares typically are not visible in use and, thus, can be disclaimed in their entireties.
