The ornamental design for a multiple head transaction device, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a multiple head transaction device of a second example embodiment of our new design. FIG. 2 is a front view of the multiple head transaction device of the second example embodiment. FIG. 3 is a back view of the multiple head transaction device of the second example embodiment. FIG. 4 is a left side view of the multiple head transaction device of the second example embodiment. FIG. 5 is a right side view of the multiple head transaction device of the second example embodiment. FIG. 6 is a top view of the multiple head transaction device of the second example embodiment. FIG. 7 is a bottom view of the multiple head transaction device of the second example embodiment; and, FIG. 8 is a perspective view of the multiple head transaction device of the second example embodiment, and showing one transaction window, of the multiple head transaction device, that is open.

The broken lines shown in the drawings are for illustrative purposes only and form no part of the claimed design. The shade lines in the figures show contour and not surface ornamentation.
