(57) **CLAIM**

The ornamental design for a display screen with animated graphical user interface with pill shape, as shown and described.

DESCRIPTION

FIG. 1 is a front view of the first image of an display screen with animated graphical user interface with pill shape in an embodiment;

FIG. 2 is a front view of the second image thereof;

FIG. 3 is a front view of the third image thereof;

FIG. 4 is a front view of the fourth image thereof;

FIG. 5 is a front view of the first image of an display screen with animated graphical user interface with pill shape in another embodiment;

FIG. 6 is a front view of the second image thereof;

FIG. 7 is a front view of the third image thereof; and,

FIG. 8 is a front view of the fourth image thereof.

The broken line showings of the display screen, text, and various features of the graphical user interface are provided to illustrate the environment related to the claimed design and form no part of the claimed design.

The appearance of the image of one embodiment transitions sequentially between the images shown in FIGS. 1-4, respectively. The appearance of the image of another embodiment transitions sequentially between the images shown in FIGS. 5-8, respectively. The process or period in which an image transitions to another forms no part of the claimed design.

1 Claim, 2 Drawing Sheets
