(57) **CLAIM**

The ornamental design for a computer screen with graphical user interface simulating a layout, as shown and described.

DESCRIPTION

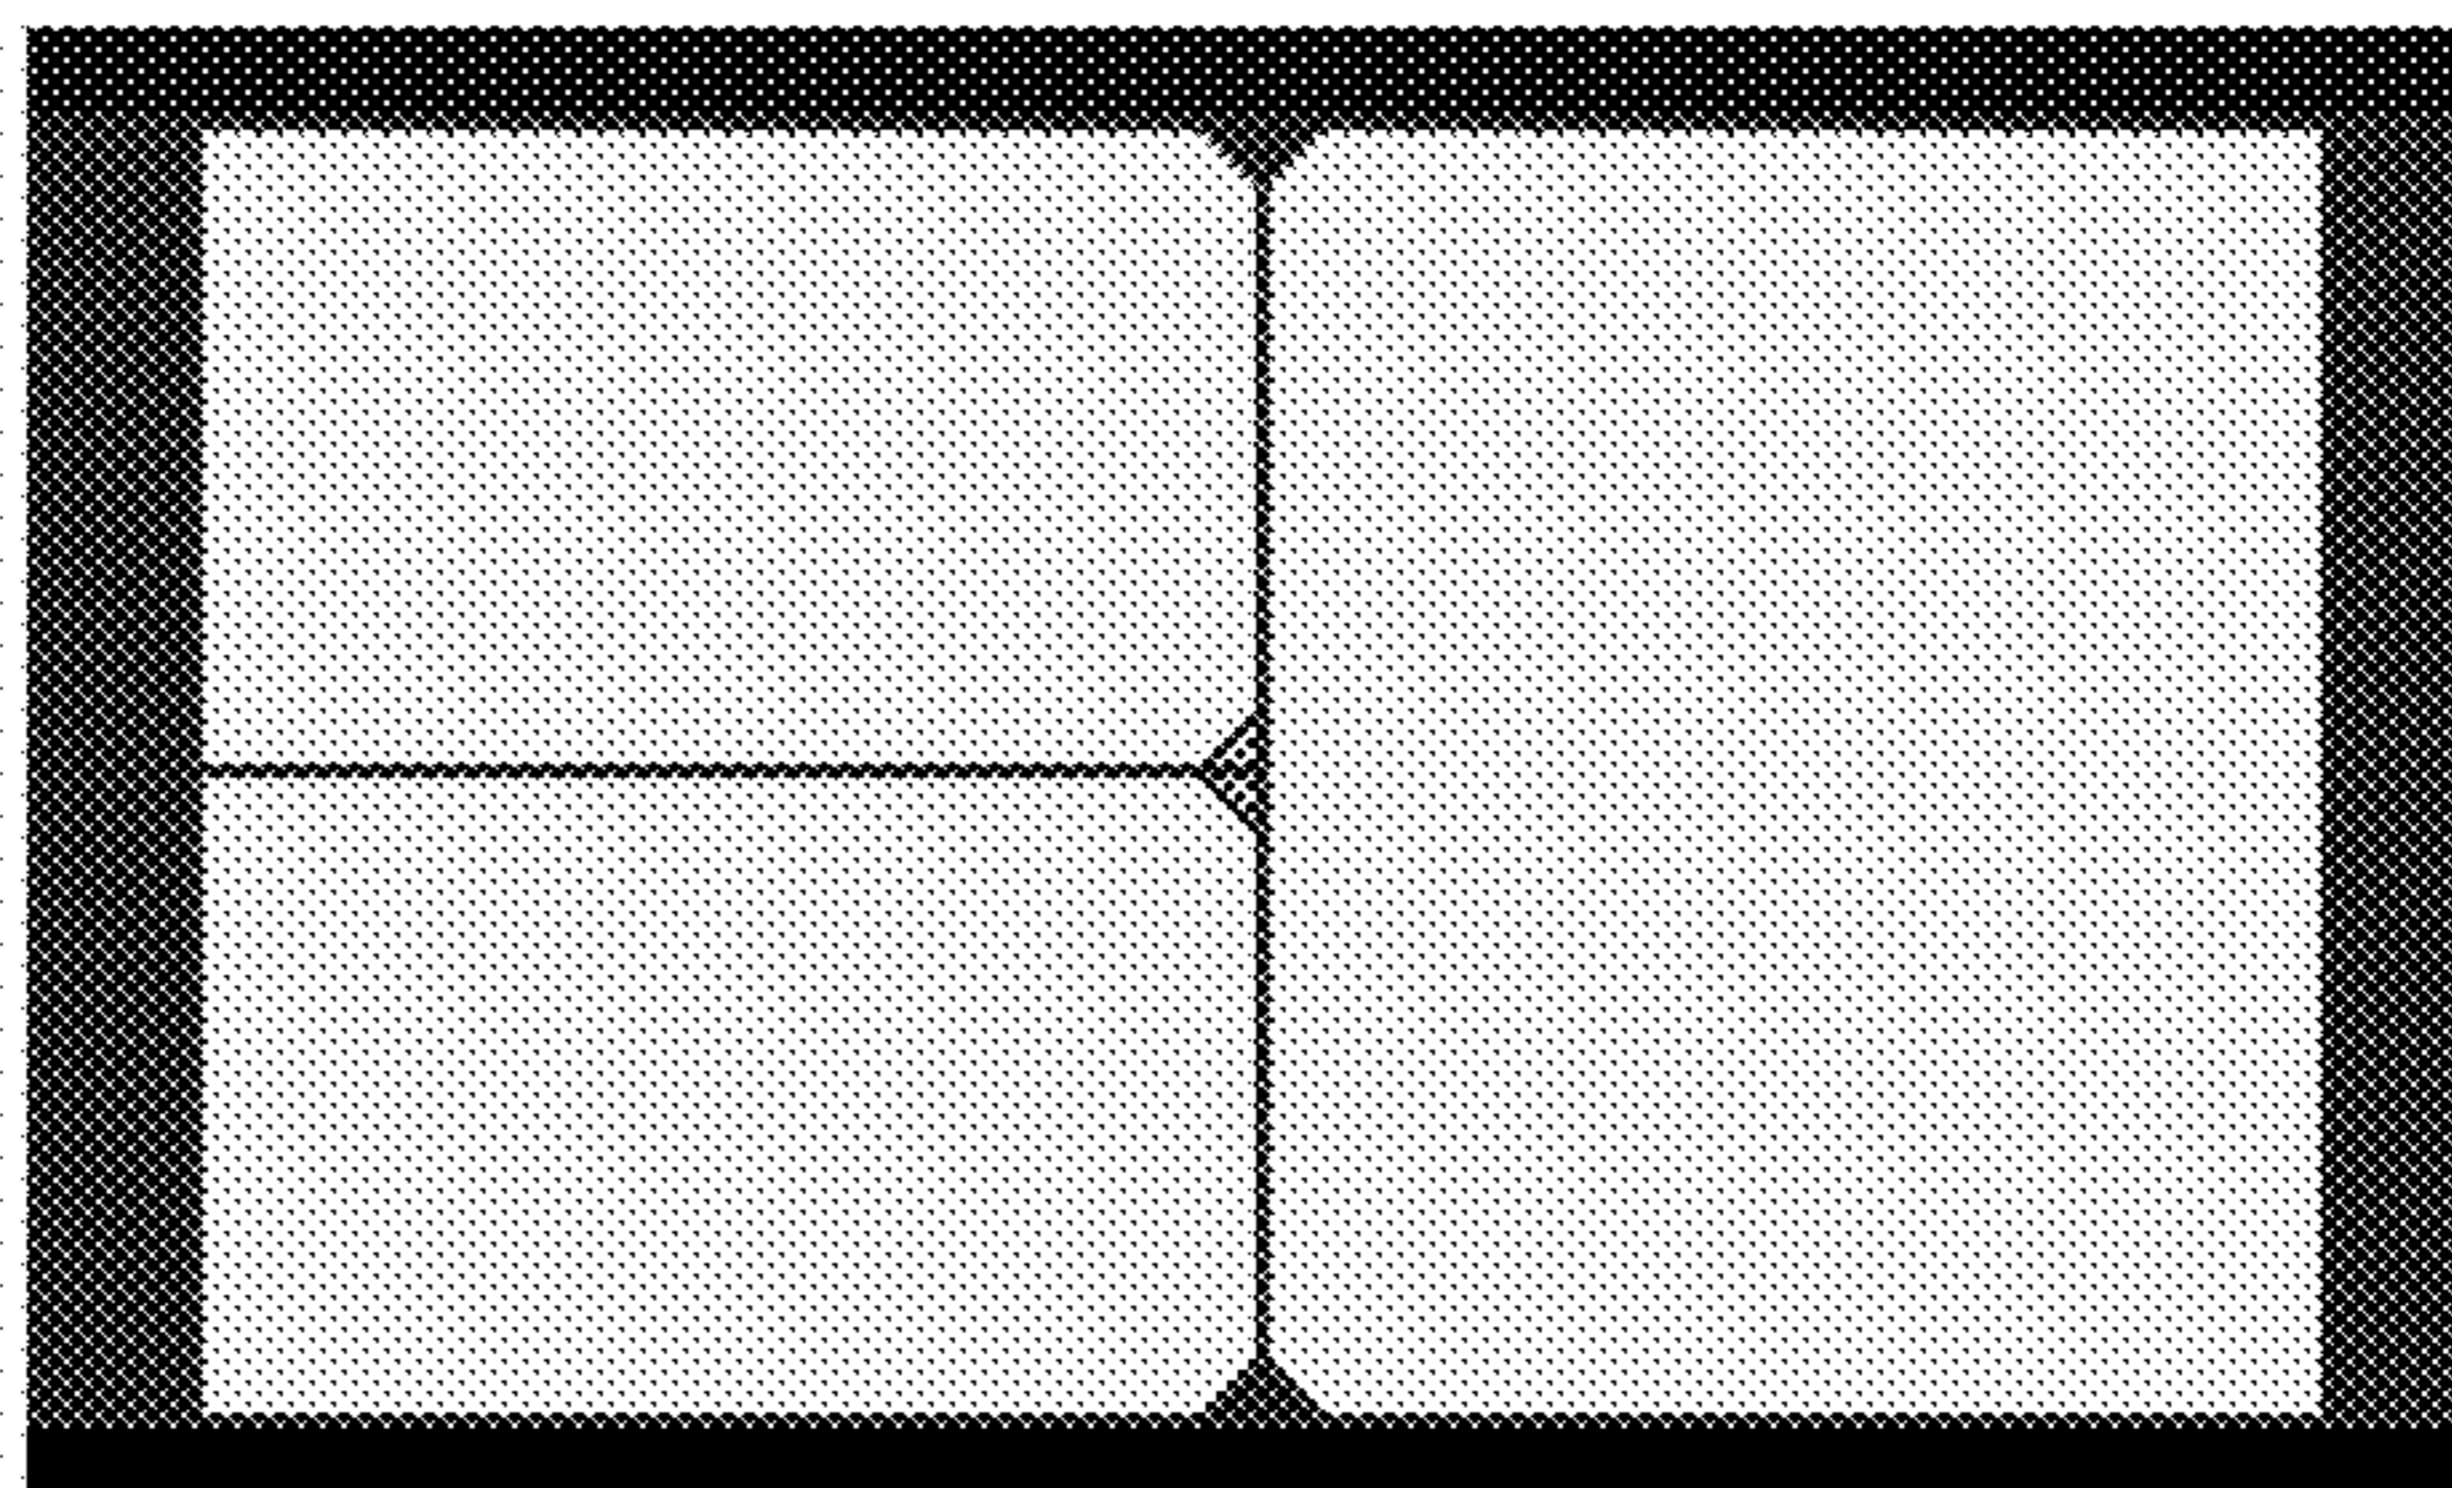

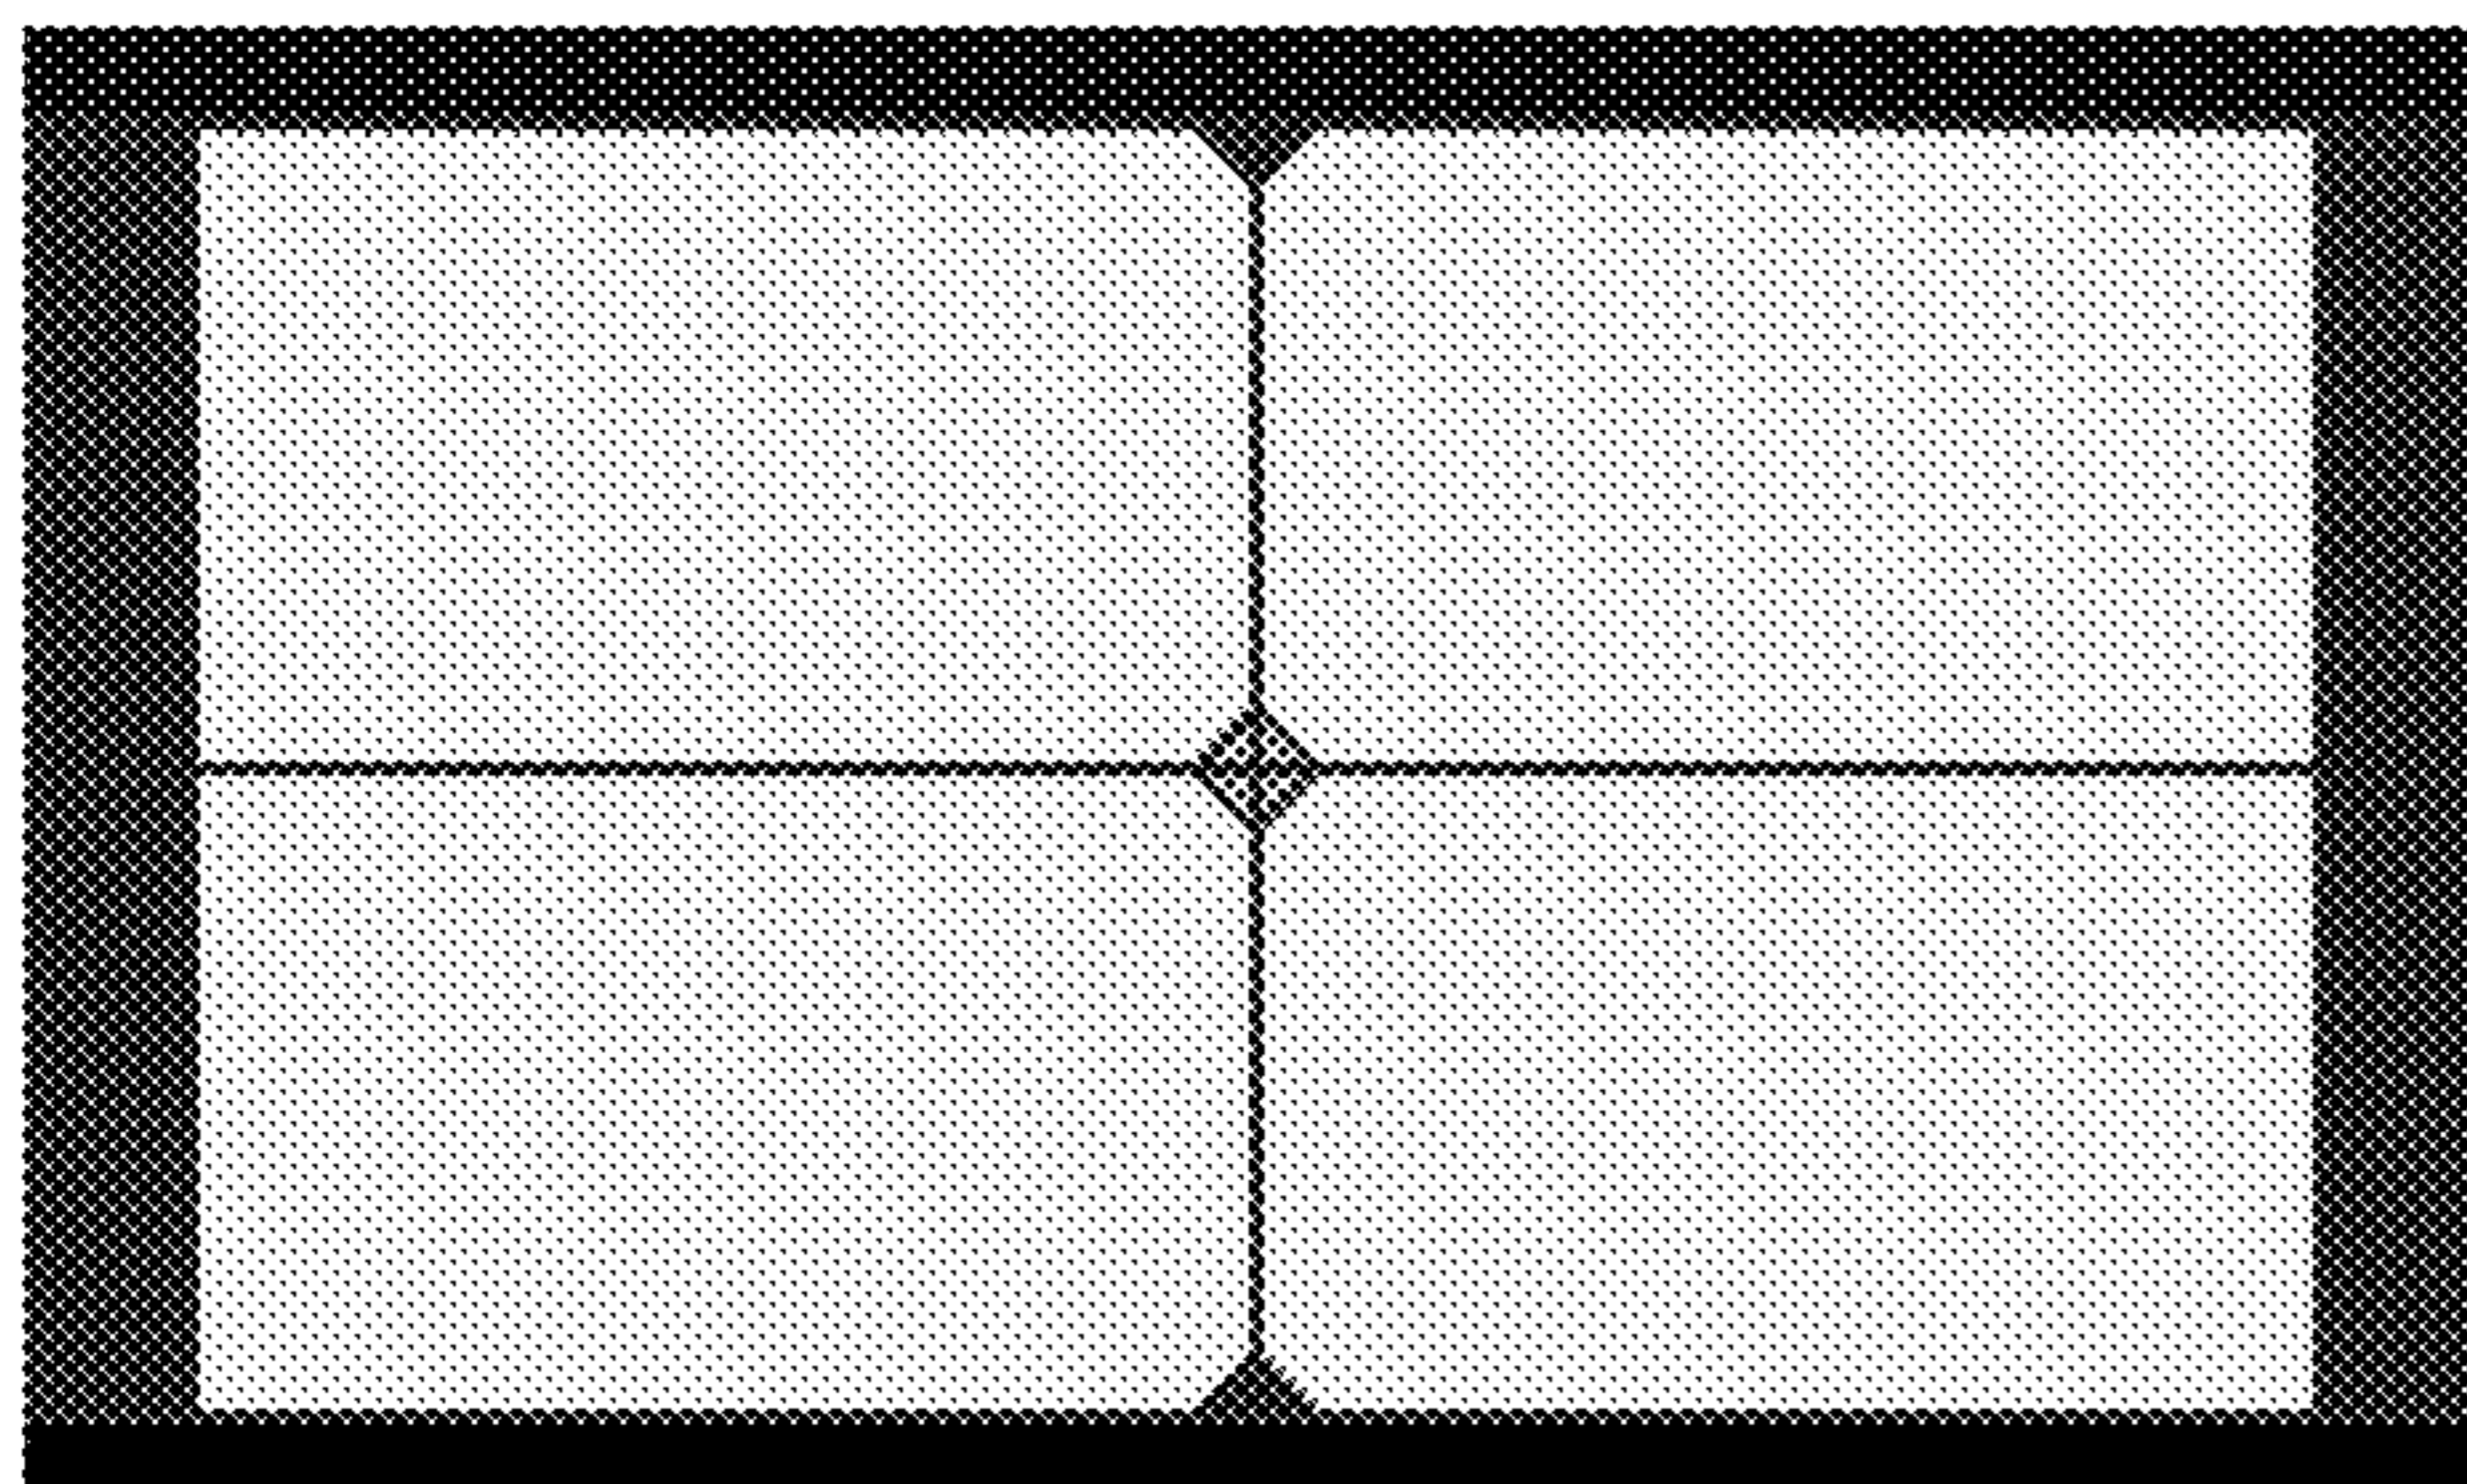

1.0-2.0 Computer screen with graphical user interface simulating a layout

1.0 : Front view of a computer screen with graphical user interface simulating a layout according to a first embodiment;

2.0 : Front view of a second embodiment thereof.

The claimed designs are for a computer screen with graphical user interface simulating a layout; the outer edge of the underlying computer screen is understood to be congruent with the graphical user interface; (design **1**) 4 adjacent windows formed of same size rectangles placed in two columns and two rows, separated by a vertical line and a horizontal line; touching corners adjacent to the vertical line are cut forming a rhomb figure at the intersection area of the vertical and horizontal lines; (design **2**) 3 adjacent windows, with two windows of same size placed one above the other on the left and separated by a horizontal line, and third window of double size placed on the right and separated from the first two windows by a vertical line; touching corners adjacent to the vertical line are cut forming a triangle figure at intersection area of the vertical and horizontal lines.
