(57) **CLAIM**
The ornamental design for a round shelving pole, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a round shelving pole; FIG. 2 is a right side elevational view of the round shelving pole shown in FIG. 1; FIG. 3 is a front elevational view of the round shelving pole shown in FIG. 1; FIG. 4 is a rear elevational view of the round shelving pole shown in FIG. 1; and, FIG. 5 is a cross-sectional, right side elevational view of the round shelving pole taken at section line 5-5 in FIG. 3. A left side elevational view of the round shelving pole is not shown because it is a mirror image of the right side elevational view that is shown in FIG. 2. A top plan view and a bottom plan view of the round shelving pole are not shown because they are identical to the right side elevational view shown in FIG. 2. The round shelving pole is shown broken in one place along the height direction in FIGS. 1, 2 and 5 to indicate indeterminate length, with the understanding that the “indeterminate” length portion of the round shelving pole not shown forms no part of the claimed design. Patentability is based only on those portions of the article that are shown in solid lines.

1 Claim, 2 Drawing Sheets
