The dashed broken lines depict portions of the gene amplification chip that form no part of the claimed design; the dot-dashed broken lines represent boundaries of the claimed gene amplification chip and form no part of the claimed design.

The article of this design is transparent. Design 1: reproduction 1.2 is an enlarged cross-sectional view sectioned vertically at a left part outside the left reaction channel of reproduction 1.1, reproduction 1.3 is an enlarged cross-sectional view sectioned vertically at the center of the right reaction channel of reproduction 1.1, reproduction 1.4 is a cross-sectional view sectioned horizontally along the detection channel of reproduction 1.1, and reproduction 1.5 is a cross-sectional view sectioned horizontally at a top part of the claimed portion of reproduction 1.1; design 2: reproduction 2.2 is an enlarged cross-sectional view sectioned vertically at the center of the detection channel of reproduction 2.1, reproduction 2.3 is an enlarged cross-sectional view sectioned vertically at a left part outside the left reaction channel of reproduction 2.1, reproduction 2.4 is a cross-sectional view sectioned horizontally along the detection channel of reproduction 2.1, and reproduction 2.5 is a cross-sectional view sectioned horizontally at a top part of the claimed portion of reproduction 2.1.
