(57) **CLAIM**

What is claimed is the ornamental design for a display panel of a programmed computer system with a graphical user interface, as shown and described.

DESCRIPTION

This invention was made with government support under Award No. 1738479 awarded by National Science Foundation's Division of Industrial Innovation and Partnerships (IIP). The government has certain rights in the invention.

FIG. **1** is a front view of a first embodiment of a display panel of a programmed computer system with a graphical user interface;

FIG. **2** is a front view of a second embodiment of a display panel of a programmed computer system with a graphical user interface;

FIG. **3** is a front view of a third embodiment of a display panel of a programmed computer system with a graphical user interface;

FIG. **4** is a front view of a fourth embodiment of a display panel of a programmed computer system with a graphical user interface;

FIG. **5** is a front view of a fifth embodiment of a display panel of a programmed computer system with a graphical user interface; and,

FIG. **6** is a front view of a sixth embodiment of a display panel of a programmed computer system with a graphical user interface.

The broken lines in the drawings illustrate portions of the article of manufacture and form no part of the claimed design.
