(57) **CLAIM**

The ornamental design for a display screen or portion thereof with graphical user interface associated with insulin delivery, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image of a display screen or portion thereof showing the design; FIG. 2 is a second image of the design; and, FIG. 3 is a third image of the design.

The appearance of the transitional image sequentially transitions between the images show in FIGS. 1-3. The process or period in which one image moves to another forms no part of the claimed design.

The broken line showing of a display screen with graphical user interface is included for the purpose of showing portions of the article which form no part of the claim.
