(57) **CLAIM**

The ornamental design for a pet bed cover, as shown and described.

DESCRIPTION

FIG. 1 is an isometric view of a first embodiment of a pet bed cover showing my new design as it would appear when encasing a cushion;

FIG. 2 is an environmental view thereof, showing the cover in an in use state;

FIG. 3 is a front elevational view thereof;

FIG. 4 is a rear elevational view thereof;

FIG. 5 is a right side elevational view thereof, the left side being a mirror image;

FIG. 6 is a top elevational view thereof;

FIG. 7 is a bottom elevational view thereof;

FIG. 8 is an isometric view of a second embodiment of my pet bed cover design, the second embodiment further including the views shown in FIGS. 4-7;

FIG. 9 is an environmental view of FIG. 8, showing the cover in an in use state;

FIG. 10 is a front elevational view of FIG. 8;

FIG. 11 is an isometric view of a third embodiment of my pet bed cover design, the third embodiment further including the views shown in FIGS. 4-7;

FIG. 12 is an environmental view of FIG. 11, showing the cover in an in use state;

FIG. 13 is a front elevational view of FIG. 11;

FIG. 14 is an isometric view of a fourth embodiment of my pet bed cover design, the fourth embodiment further including the views shown in FIGS. 4-7;

FIG. 15 is an environmental view of FIG. 14, showing the cover in an in use state; and,

FIG. 16 is a front elevational view of FIG. 14.

In the figures, two types of broken lines are used. The even-length broken lines located in the front panel indicate visible stitching that is part of the claimed design. Uneven-length broken lines illustrate unclaimed subject matter and form no part of the claimed design. The generally horizontally-oriented uneven-length broken line region located in the unclaimed region of the back panel represents an unclaimed zipper region and forms no part of the claimed design. The uneven-length broken line adjacent the right edge of the claimed region represents an unclaimed boundary of the design. The substantially parallel uneven-length broken lines around the perimeter of the cover represent unclaimed decorative piping. The uneven-length broken lines showing the remainder of the cover are for environmental purposes only and form no part of the claim design.

(Continued)

The surface shading on the claimed region is provided only to indicate character and/or contour of the claimed surfaces and does not represent any particular color, texture, material, or finish.

References to “front”, “rear”, “side”, “top”, and “bottom” in the figure descriptions are not meant to require certain in-use orientation; a cover according to the claimed design may be used in any orientation.
