(73) Assignee: **Axis Lighting Inc.**, LaSalle (CA)

(57) **CLAIM**

(*) Notice: This patent is subject to a terminal disclaimer.

What is claimed is the ornamental illuminatable design for a luminaire structure, as shown and described.

(**) Term: **15 Years**

DESCRIPTION

(21) Appl. No.: **29/624,848**

(22) Filed: **Nov. 3, 2017**

Related U.S. Application Data

(63) Continuation-in-part of application No. 29/595,928, filed on Mar. 3, 2017, now Pat. No. Des. 870,956.

FIG. 1 is perspective view of the luminaire structure showing our design;
FIG. 2 is an upper perspective view as viewed from above thereof;
FIG. 3 is a front elevational view thereof, where the rear elevational view is a mirror of this view and, therefore, has been omitted;
FIG. 4 is a right side elevational view thereof, where the left side elevational view is a mirror image of this view and, therefore, has been omitted;
FIG. 5 is a top plan view thereof; and,
FIG. 6 is a bottom plan view thereof.

(Continued)

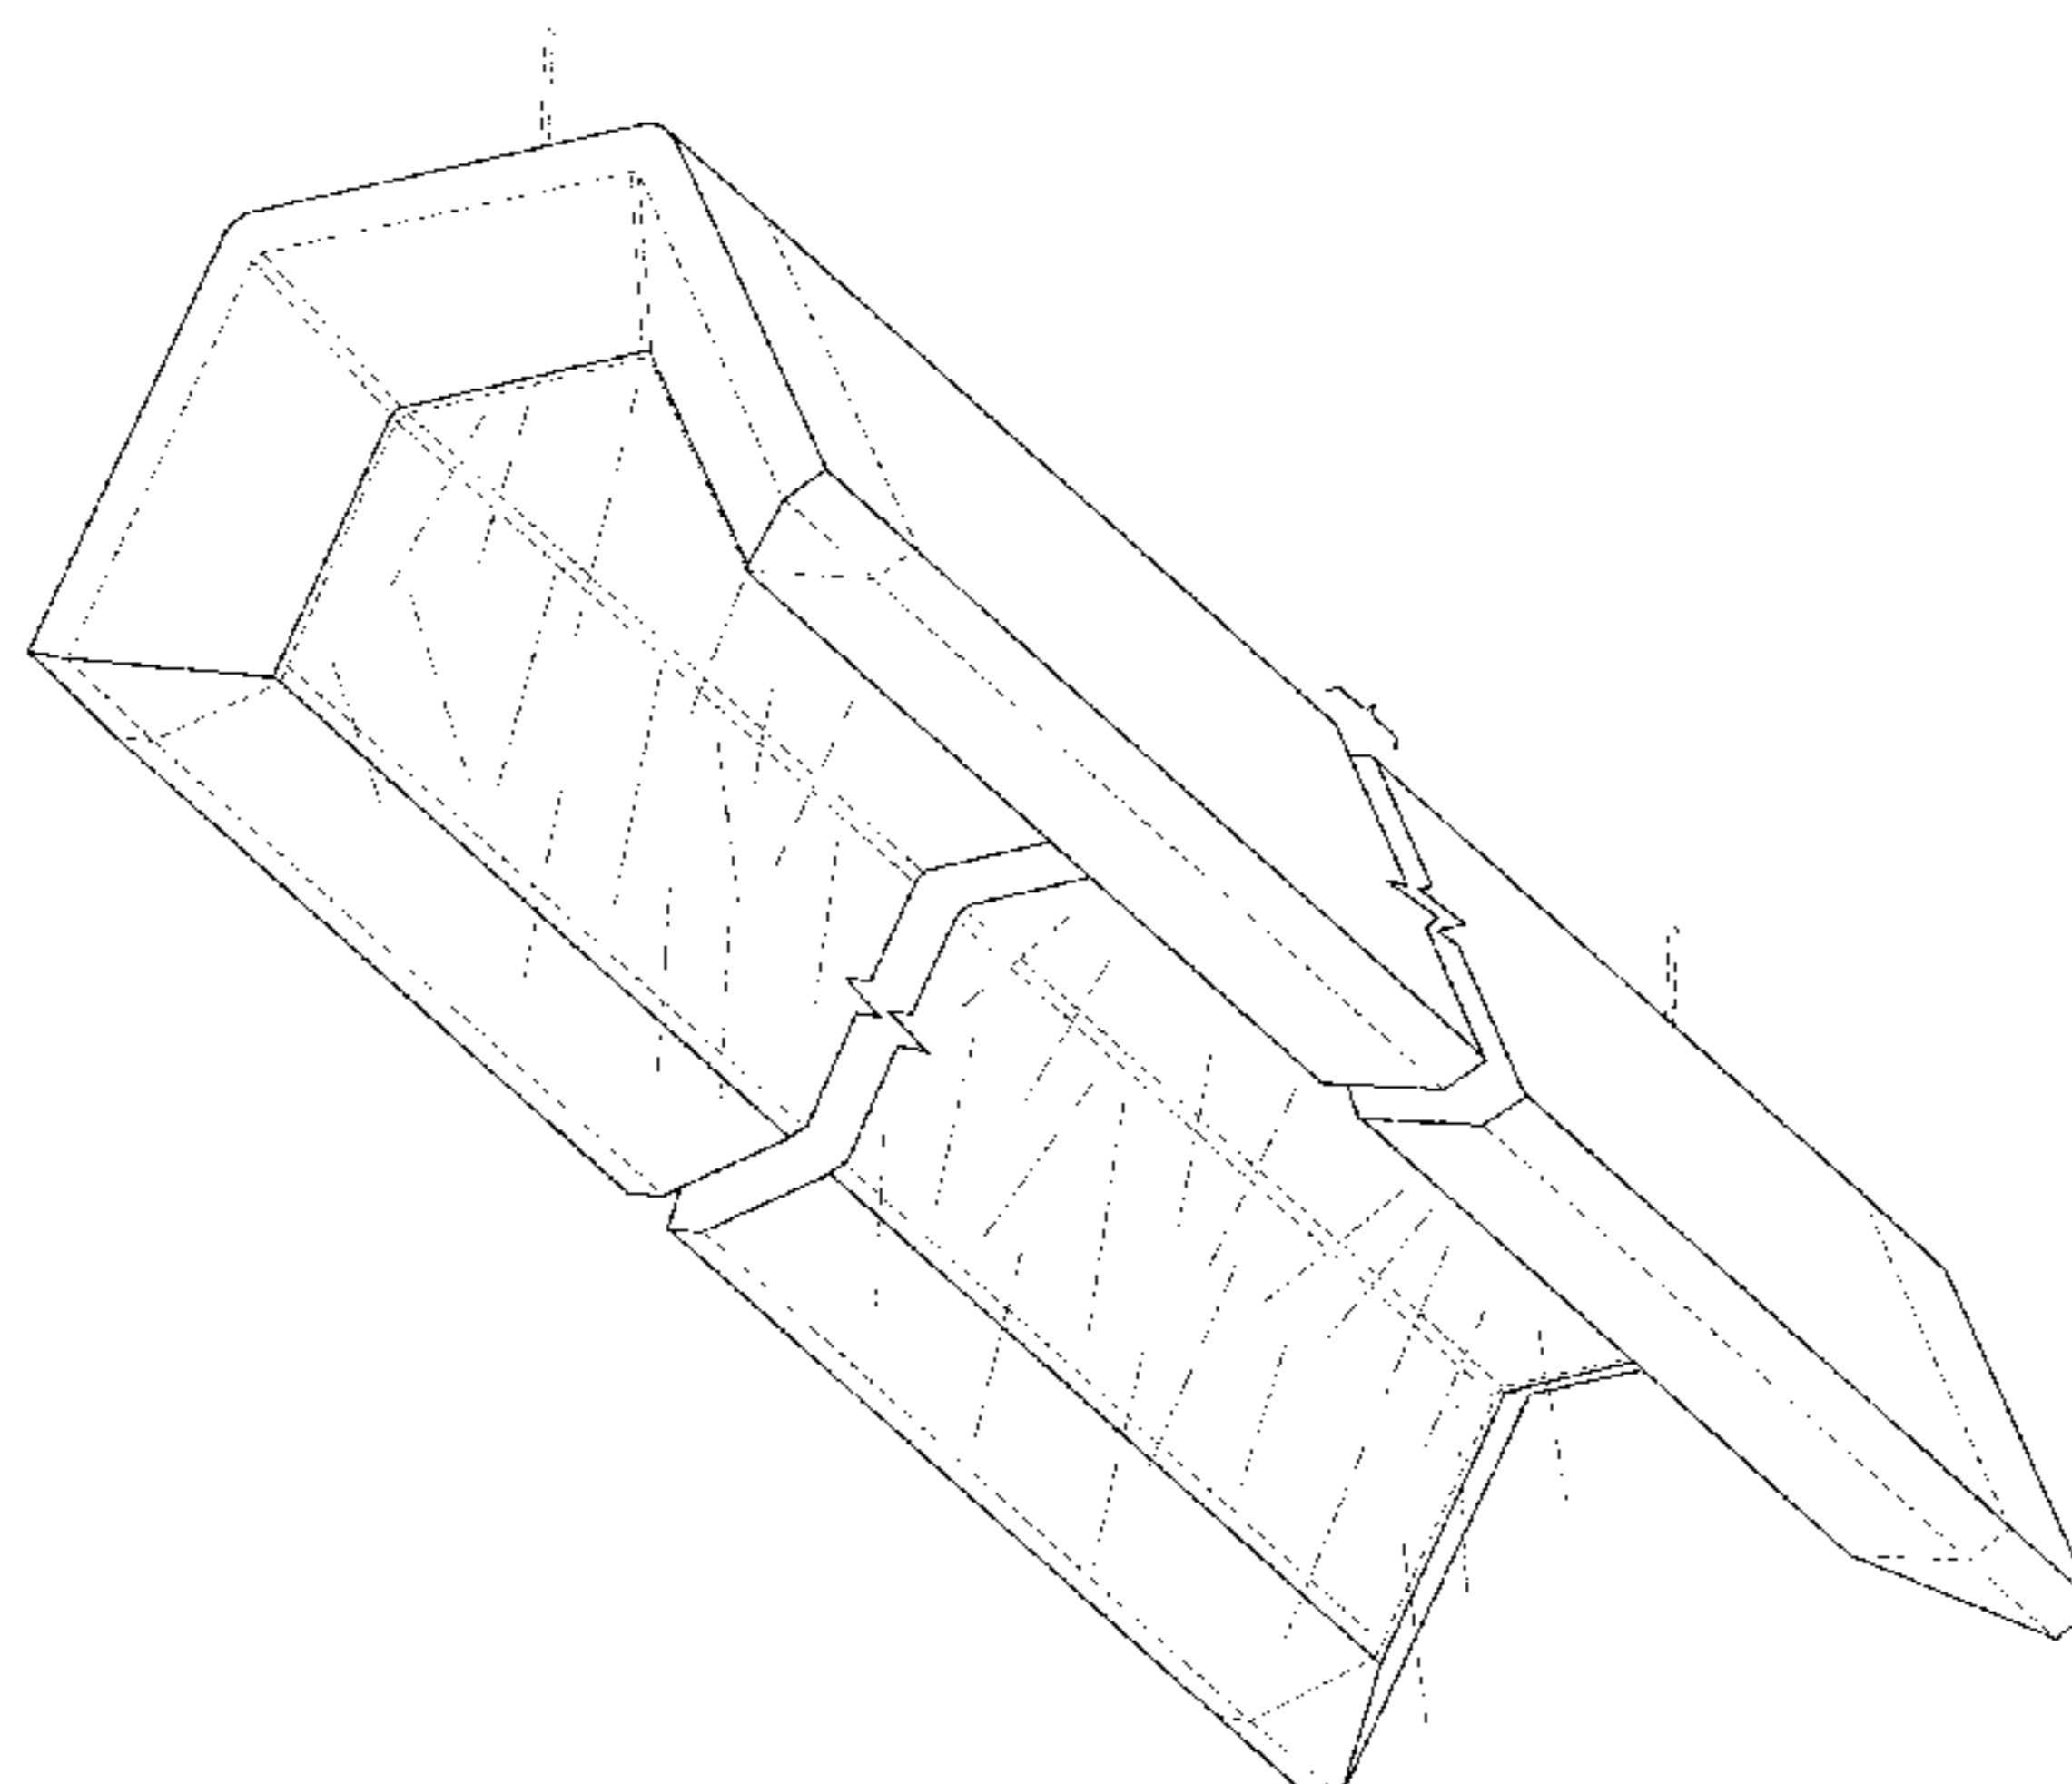

The luminaire structure is an illuminatable device capable of multiple states of illumination. The broken radiating line representations shown in FIGS. 1-3 and 6 represent illuminated surfaces in a state of illumination. The other broken lines in the figures are directed to environment and are for illustrative purposes. The luminaire structure is shown with symbolic break lines along its length, width and/or depth. The appearance of a portion of the article between the break lines does not form part of the design. A separation and a bracket are used to indicate that, for ease of illustration, the specific dimension of the article associated with the separation and bracket is not claimed and is to be broadly interpreted. The subject matter herein includes any of the present figures with any such symbolic break lines removed, or with one or more further symbolic break lines added.
