(57) **CLAIM**

The ornamental design for a display screen or portion thereof with animated graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a display screen or portion thereof with animated graphical user interface showing a first image

in an animated sequence of the graphical user interface according to the claimed design.

FIG. 2 is a front view of the display screen or portion thereof with animated graphical user interface showing a second image in the animated sequence of the graphical user interface.

FIG. 3 is a front view of the display screen or portion thereof with animated graphical user interface showing a third image in the animated sequence of the graphical user interface.

FIG. 4 is a front view of the display screen or portion thereof with animated graphical user interface showing a fourth image in the animated sequence of the graphical user interface.

FIG. 5 is a front view of the display screen or portion thereof with animated graphical user interface showing a fifth image in the animated sequence of the graphical user interface; and,

FIG. 6 is a front view of the display screen or portion thereof with animated graphical user interface showing a sixth image in the animated sequence of the graphical user interface.

The dash-dot broken lines showing the display screen or portion thereof in FIGS. 1-6 illustrate environmental subject matter that forms no part of the claimed design.

The dash-dash broken lines in FIGS. 1-6 illustrate portions of the graphical user interface that form no part of the claimed design.

FIGS. 1-6 each show images of the animated sequence of the graphical user interface, and the appearance of the graphical user interface sequentially transitions between the images shown in FIGS. 1-6. The process or period in which an image transitions to another forms no part of the claimed design.

The diagonal hatch shading applied to the first image of the image cluster, the cross-hatch shading applied to the second image of the image cluster, and the stipple shading applied to the third image of the image cluster in FIGS. 4-6 represent contrasting appearance, but a pattern formed by each shading forms no part of the claimed design. The subject of each image shown in dash-dash broken lines and the label of each
