(57) **CLAIM**

What is claimed is the ornamental design for the digital pathology apparatus display screen with graphical user interface, as shown and described.

DESCRIPTION

The FIGURE is a front view of a digital pathology apparatus display screen with graphical user interface according to the present invention.

The broken lines are included for the purpose of illustrating portions of the digital pathology apparatus display screen with graphical user interface and form no part of the claimed design. All broken lines that represent the physical display environmental structure or physical or graphical boundaries form no part of the claimed design. The digital pathology apparatus display screen with graphical user interface is intended for use with a digital pathology apparatus that is not shown in the drawing and forms no part of the claimed design.
