(57) **CLAIM**

The ornamental design for a computer display panel with a meeting objective editing graphical user interface for an application that optimizes interpersonal interaction, as shown and described.

DESCRIPTION

The FIGURE is a front view of a computer display panel with a meeting objective editing graphical user interface for an application that optimizes interpersonal interaction, showing our new design.

The broken lines in the drawing showing the computer display panel and portions of the graphical user interface form no part of the claimed design.
