(57) **CLAIM**

The ornamental design for a cover for automobile computer system, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a cover for automobile computer system, showing our new design; FIG. 2 is a front elevation view thereof; FIG. 3 is top plan view thereof; and, FIG. 4 is a left side elevation view thereof.

Throughout the Figures, the dashed broken lines represent environmental structure that that forms no part of the claimed design.

The portion of the design that indicates a reflective surface permits light from the automobile computer system to be seen through the reflective surface.

The Applicants reserve the right to convert any or all of the broken lines in the Figures to solid lines during the course of prosecution of this application and/or in one or more continuation applications, since the Figures convey that, at the time of filing, the inventors had possession of all the features shown in broken lines, separately and in combination.
