(57) **CLAIM**

The ornamental design for a training band, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of the training band, showing my new design;  
 FIG. 2 is a front elevation view thereof;  
 FIG. 3 is a right side elevation view thereof, the left side being a mirror image thereof;  
 FIG. 4 is a front elevation view thereof in an expanded state;  
 FIG. 5 is a perspective view of a second embodiment of the training band, showing my new design;  
 FIG. 6 is a front elevation view thereof;  
 FIG. 7 is a right side elevation view thereof, the left side being a mirror image thereof; and,  
 FIG. 8 is a front elevation view thereof in an expanded state.  
 The broken lines depict environmental structure (e.g., connectors between claimed elements of the band) and do not form a part of the claim.  
 The portion of the training band with the handles is illustrated with break lines, indicating an indeterminate length of the band. Neither the break lines, nor the space between the break lines, form a part of the claimed invention.

**1 Claim, 2 Drawing Sheets**
