(57) **CLAIM**

The ornamental design for a drying rack, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a drying rack showing our new design in a first configuration where the arms are outwardly extending in a first configuration which may, for example, be a storage configuration;

FIG. 2 is a front perspective view of the drying rack in second configuration where the arms are outwardly extending in a second configuration which may, for example, be arranged for drying various household items;

FIG. 3 is a front elevation view thereof;

FIG. 4 is a rear elevation view thereof;

FIG. 5 is a right side elevation view thereof;

FIG. 6 is a left side elevation view thereof;

FIG. 7 is the top plan view thereof; and,

FIG. 8 is the bottom plan view thereof.

The broken lines in the drawings depict portions of the drying rack that form no part of the claimed design. In particular, the top cap, the circular base, and the upper and lower arms form no part of the claimed design.

It should be appreciated that the plurality of arms of the drying rack may be rotatable such that they can be arranged in a different angular orientation with respect to each other as the invention is not limited to the particular angular orientations illustrated in the drawings.
