(57) **CLAIM**

The ornamental design for display screen or portion thereof with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence for a display screen or portion thereof with graphical user interface;

FIG. 2 is an enlarged view of the portion identified in FIG. 1 by dot-dash broken lines;

FIG. 3 is a second image thereof;

FIG. 4 is an enlarged view of the portion identified in FIG. 3 by dot-dash broken lines;

FIG. 5 is a front view of a first image in a sequence for a display screen or portion thereof with graphical user interface according to a second embodiment;

FIG. 6 is an enlarged view of the portion identified in FIG. 5 by dot-dash broken lines;

FIG. 7 is a second image thereof; and,

FIG. 8 is an enlarged view of the portion identified in FIG. 7 by dot-dash broken lines.

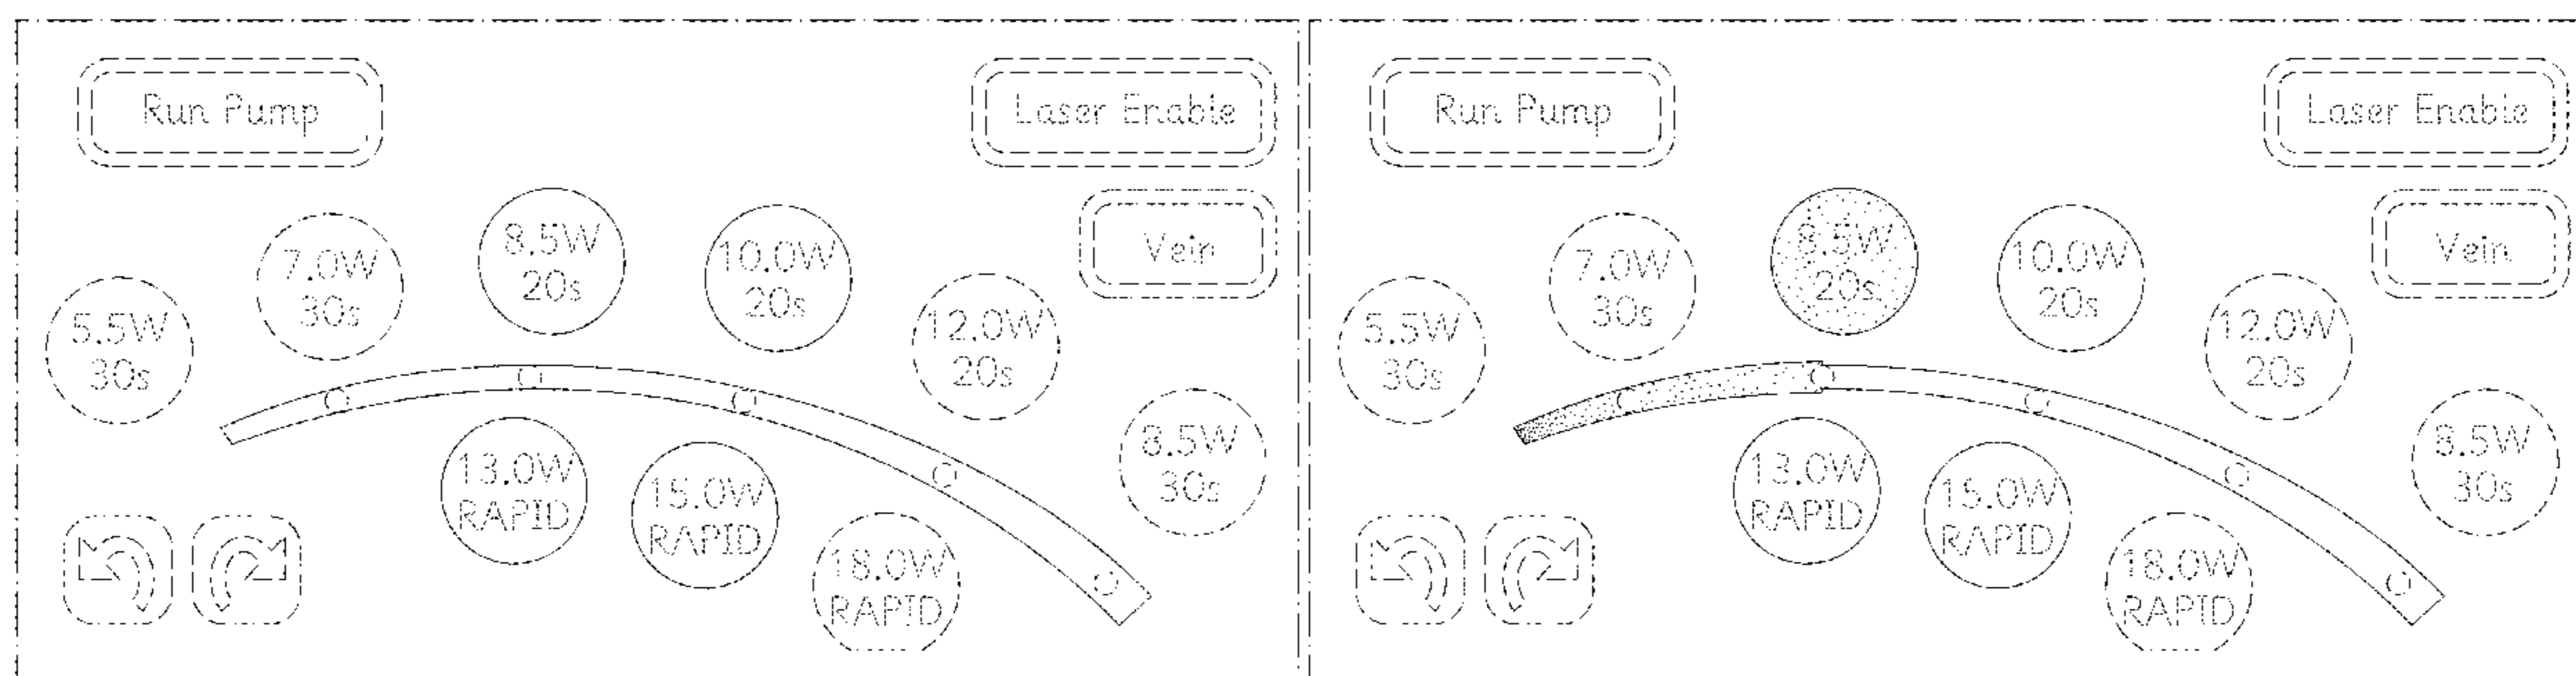

The broken line showing of the display screen is for the purpose of illustrating environmental structure and forms no part of the claimed design. The broken line showing the remainder of the image in all views illustrates unclaimed portions of the design and forms no part thereof.

In the drawings, the dot-dash broken lines represent unclaimed boundary lines of the graphical user interface and form no part of the claimed design. The dash-dash broken lines are for the purpose of illustrating portions of a display screen or portion thereof with transitional graphical user interface that forms no part of the claimed design.

The boundaries shown for the graphical user interface and the display screen provide a context of the claimed design as being on an article of manufacture.

The appearance of the graphical user interface transitions sequentially between the images in FIGS. 1-4 and 5-8 respectively. The process or period in which one image transitions to another forms no part of the claimed design. The stippling, shading, and tonal differences in each embodiment represent a contrast in appearance among various elements in the claimed design.
