(57) **CLAIM**

The ornamental design for a watch stand, as shown and described.

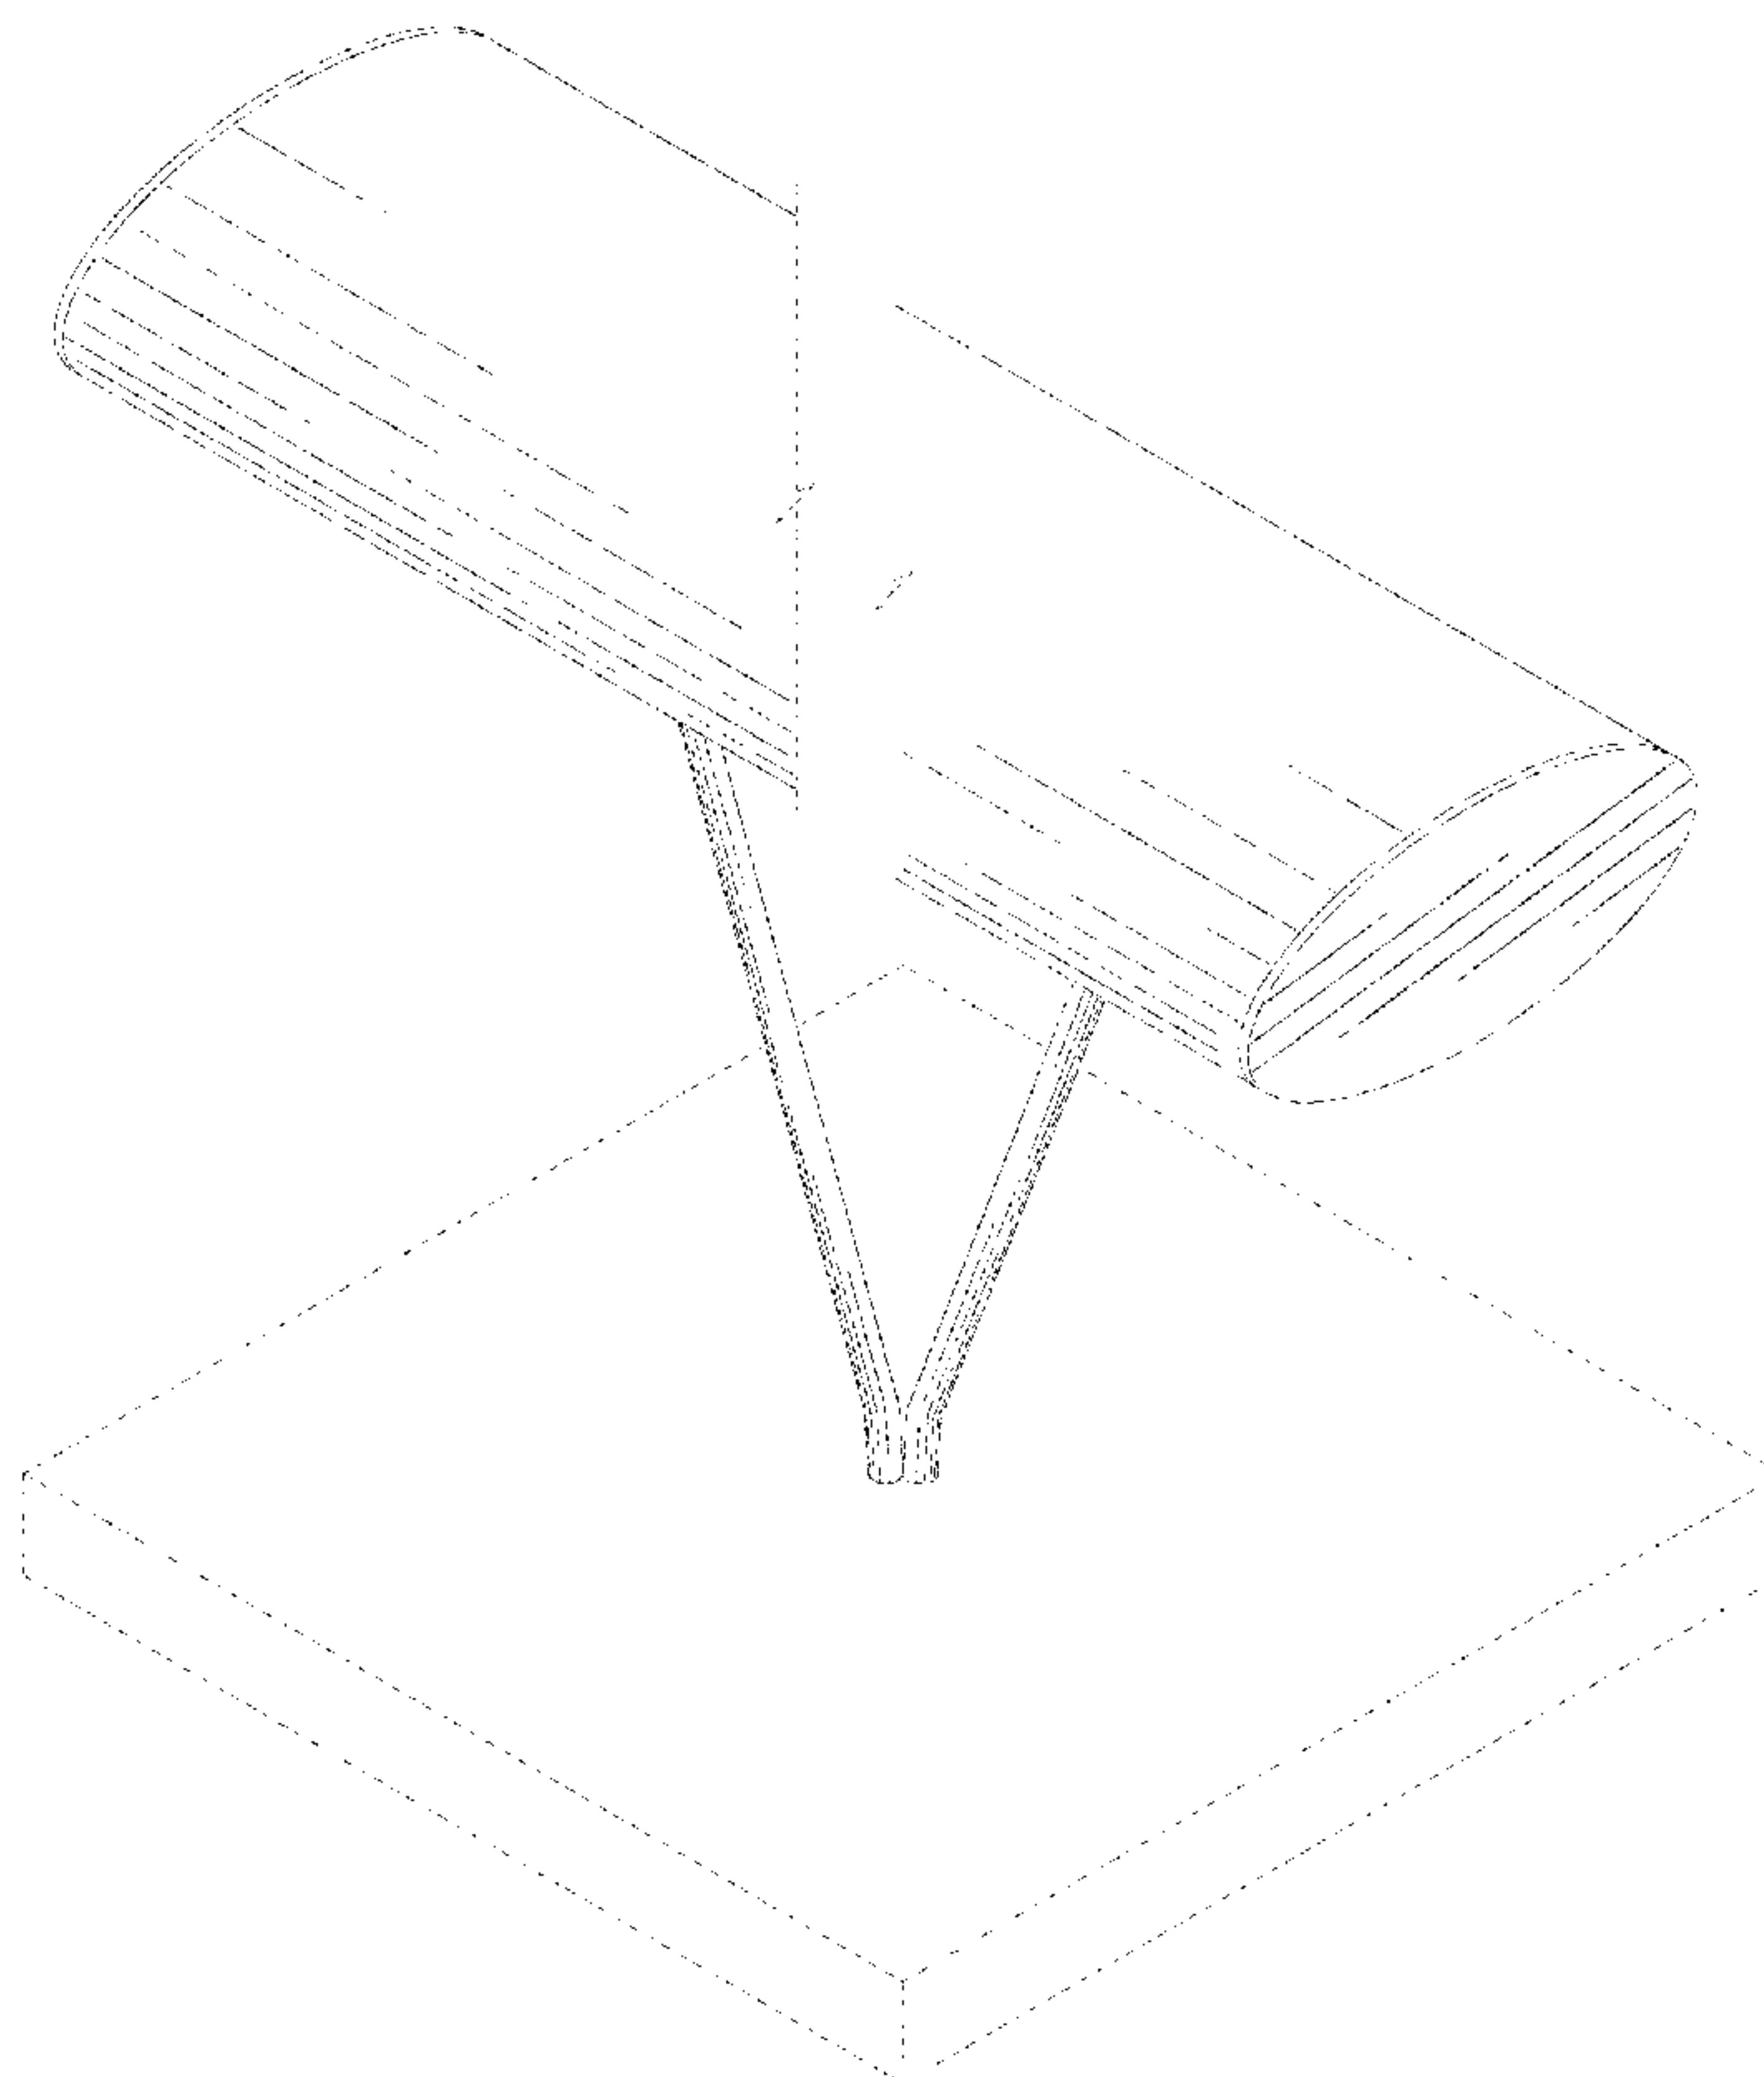

DESCRIPTION

FIG. 1 is a front top left perspective view of a watch stand; FIG. 2 is a rear bottom right perspective view thereof; FIG. 3 is a front elevational view thereof, where the rear elevational view is identical thereto; FIG. 4 is a top plan view thereof; FIG. 5 is a bottom plan view thereof; and, FIG. 6 is a left elevational view thereof; where the right elevational view is identical thereto.

The broken line showing a base in FIGS. 1-6 are included for the purpose of illustrating environmental structure and forms no part of the claimed design. The watch stand is shown with a symbolic break in its length. The appearance of any portion of the article between the break lines forms no part of the claimed design.

The watch stand is shown broken in one place along the length direction in FIGS. 1-4 to indicate indeterminate length, with the understanding that the "indeterminate" length portion of the watch stand not shown forms no part of the claimed design. Patentability is based only on those portions of the article that are shown in solid lines.

1 Claim, 6 Drawing Sheets
