(57) **CLAIM**

The ornamental design for a display screen with graphical
user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with graphical user
interface showing a first image in an animation sequence of
the graphical user interface according to the claimed design;
and,

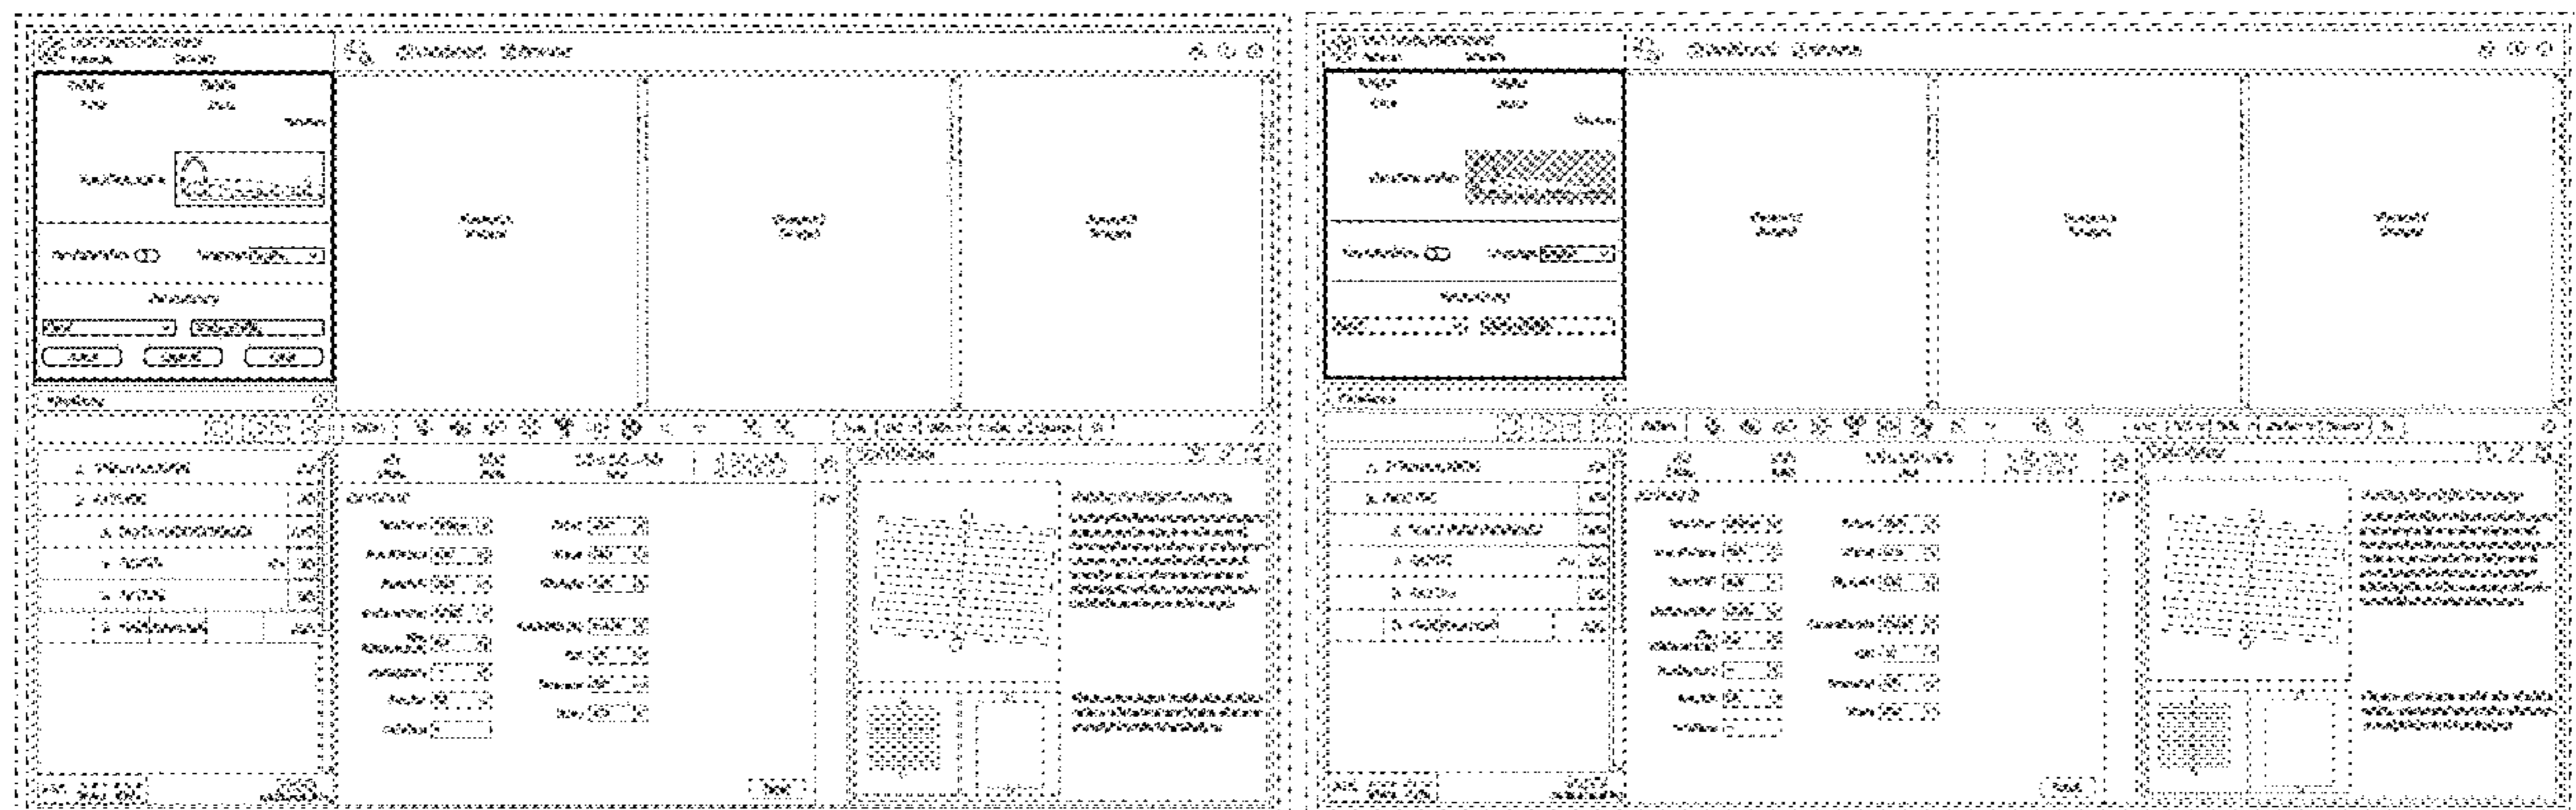

FIG. 2 is a front view of the display screen with graphical
user interface showing a second image in the animation
sequence of the graphical user interface.

The dash-dot-dash broken lines showing the display screen
and the dash-dash broken lines showing the graphical user
interface illustrate portions of the display screen with
graphical user interface that form no part of the claimed
design.

The appearance of the graphical user interface sequentially
transitions between the images shown in FIGS. 1-2. The
process or period in which an image transitions to another
forms no part of the claimed design.

The oblique hatch shading at the patient position section and
set anatomy section in FIG. 2 illustrates contrast in appear-
ance, although no particular color is claimed and any pattern
formed by the oblique hatch shading forms no part of the
claimed design.
