(57) **CLAIM**

The ornamental design for an electronic gaming machine display screen or portion thereof with a graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of an electronic gaming machine display screen or portion thereof with a graphical user interface (GUI) showing the first image in a sequence; and, FIG. 2 is a front view thereof showing the second image in the sequence.

The appearance of the GUI sequentially transitions between the images shown in FIGS. 1-2, with the left edge of the screen portions remaining stationary and providing a common point of reference between FIGS. 1-2. The process or period in which one image transitions to another image forms no part of the claimed design.

The outer dot-dash lines shown in FIGS. 1-2 illustrate the perimeters of screen portions and form no part of the claimed design. The remaining broken lines illustrate portions of the GUI and form no part of the claimed design.
