(57) **CLAIM**

The ornamental design for a display screen with an animated graphical user interface for medical software, as shown and described.

DESCRIPTION

FIG. 1 is a first image of a display screen with an animated graphical user interface for medical software showing the new design;

FIG. 2 is a second image thereof;

FIG. 3 is a third image thereof; and,

FIG. 4 is a fourth image thereof.

The broken lines showing the display screen form no part of the claimed design. The broken lines showing various graphic elements forms no part of the claimed design.

The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1-4. The process or period in which one image transitions to another forms no part of the claimed design.
