(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence according to a first embodiment of our design for a display screen with transitional graphical user interface;

FIG. 2 is a front view of a second image in the sequence thereof;

FIG. 3 is a front view of a first image in a sequence according to a second embodiment of our design for a display screen with transitional graphical user interface;

FIG. 4 is a front view of a second image in the sequence thereof;

FIG. 5 is a front view of a first image in a sequence according to a third embodiment of our design for a display screen with transitional graphical user interface;

FIG. 6 is a front view of a second image in the sequence thereof;

FIG. 7 is a front view of a first image in a sequence according to a fourth embodiment of our design for a display screen with transitional graphical user interface;

FIG. 8 is a front view of a second image in the sequence thereof;

FIG. 9 is a front view of a first image in a sequence according to a fifth embodiment of our design for a display screen with transitional graphical user interface;

FIG. 10 is a front view of a second image in the sequence thereof;

FIG. 11 is a front view of a first image in a sequence according to a sixth embodiment of our design for a display screen with transitional graphical user interface;

FIG. 12 is a front view of a second image in the sequence thereof;

FIG. 13 is a front view of a first image in a sequence according to the first embodiment of our design for a display screen with transitional graphical user interface, showing alternative environmental structure;

FIG. 14 is a front view of a second image in the sequence thereof;

FIG. 15 is a front view of a first image in a sequence according to the second embodiment of our design for a display screen with transitional graphical user interface, showing alternative environmental structure;

FIG. 16 is a front view of a second image in the sequence thereof;

FIG. 17 is a front view of a first image in a sequence according to the third embodiment of our design for a display screen with transitional graphical user interface, showing alternative environmental structure;

(Continued)

FIG. 18 is a front view of a second image in the sequence thereof;

FIG. 19 is a front view of a first image in a sequence according to the fourth embodiment of our design for a display screen with transitional graphical user interface, showing alternative environmental structure;

FIG. 20 is a front view of a second image in the sequence thereof;

FIG. 21 is a front view of a first image in a sequence according to the fifth embodiment of our design for a display screen with transitional graphical user interface, showing alternative environmental structure;

FIG. 22 is a front view of a second image in the sequence thereof;

FIG. 23 is a front view of a first image in a sequence according to the sixth embodiment of our design for a display screen with transitional graphical user interface, showing alternative environmental structure; and,

FIG. 24 is a front view of a second image in the sequence thereof.

The appearance of the transitional image transitions between the images shown in FIGS. 1-2, 3-4, 5-6, 7-8, 9-10, 11-12, 13-14, 15-16, 17-18, 19-20, 21-22 and 23-24, respectively.

The process or period in which one image transitions to another image forms no part of the claimed design.

The shading is part of the claimed design. The outermost broken lines and the outer broken line circle illustrates the electronic device, the broken line at the perimeter of the figure illustrates the display screen and a boundary and the remaining broken lines illustrate portions of the transitional graphical user interface. None of the broken lines form part of the claimed design.

1 Claim, 24 Drawing Sheets
