(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence according to a first embodiment of our design for a display screen with transitional graphical user interface; and FIG. 2 is a front view of a second image in the sequence thereof.

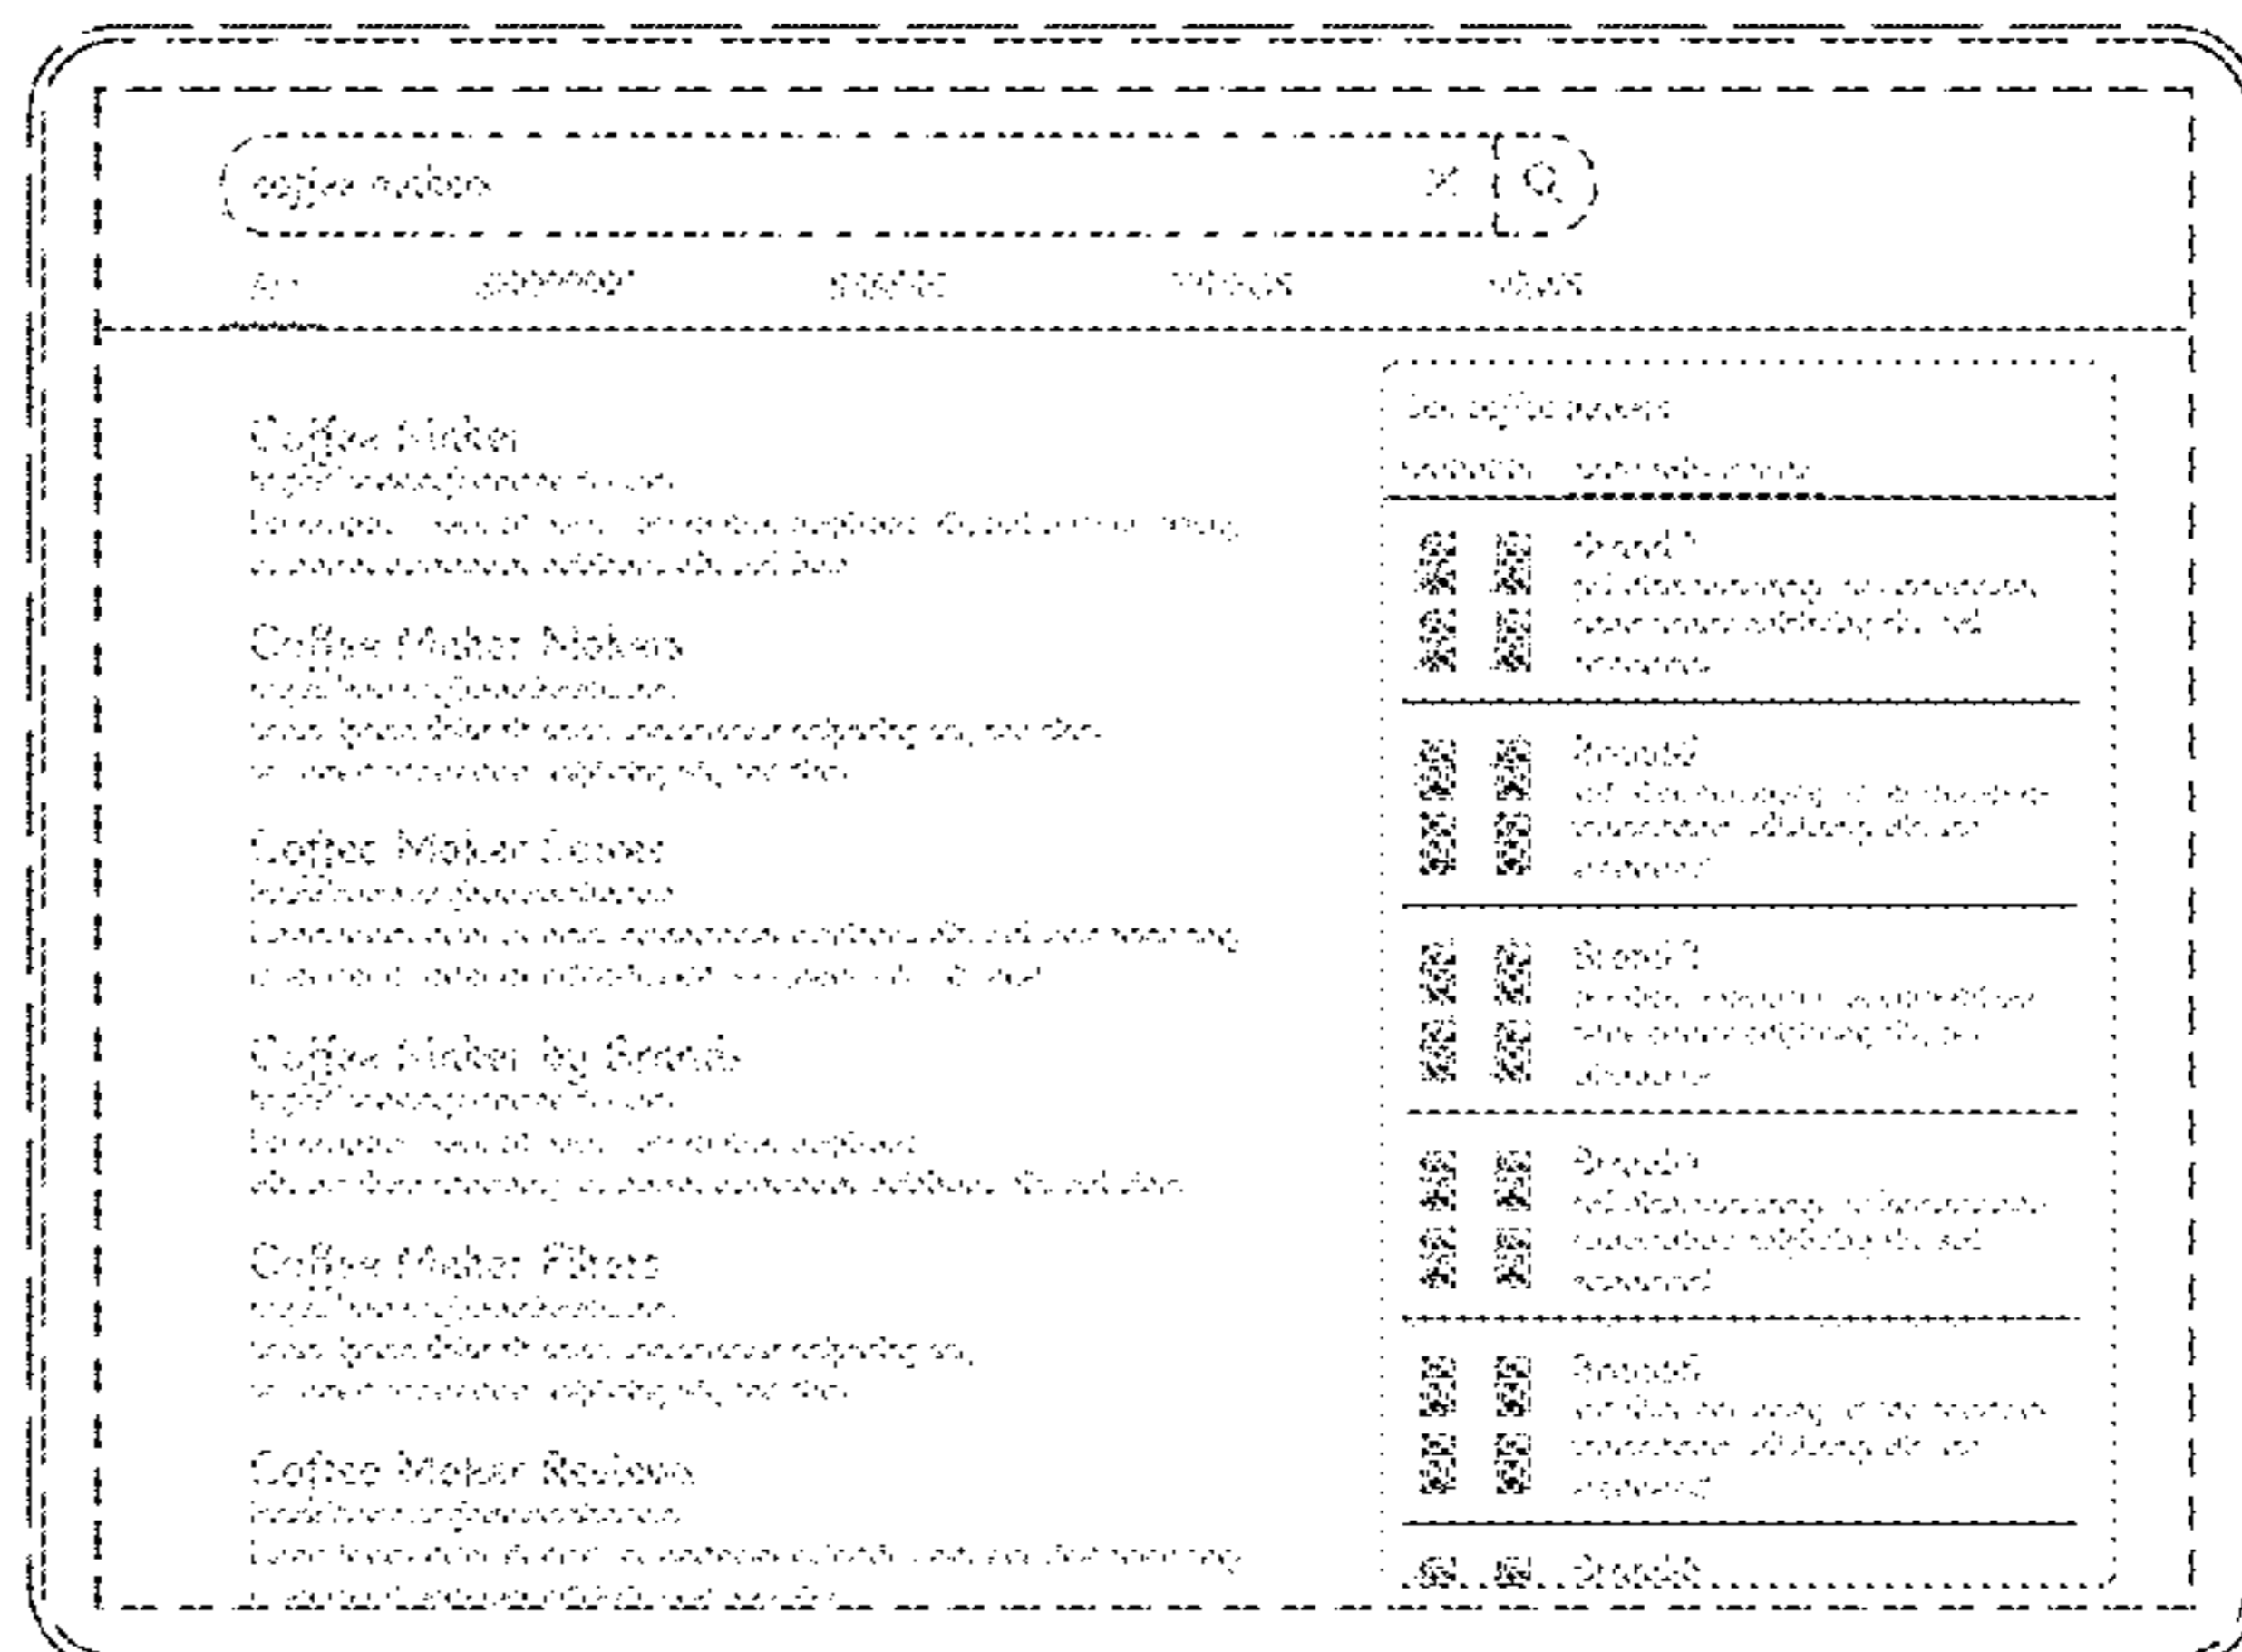

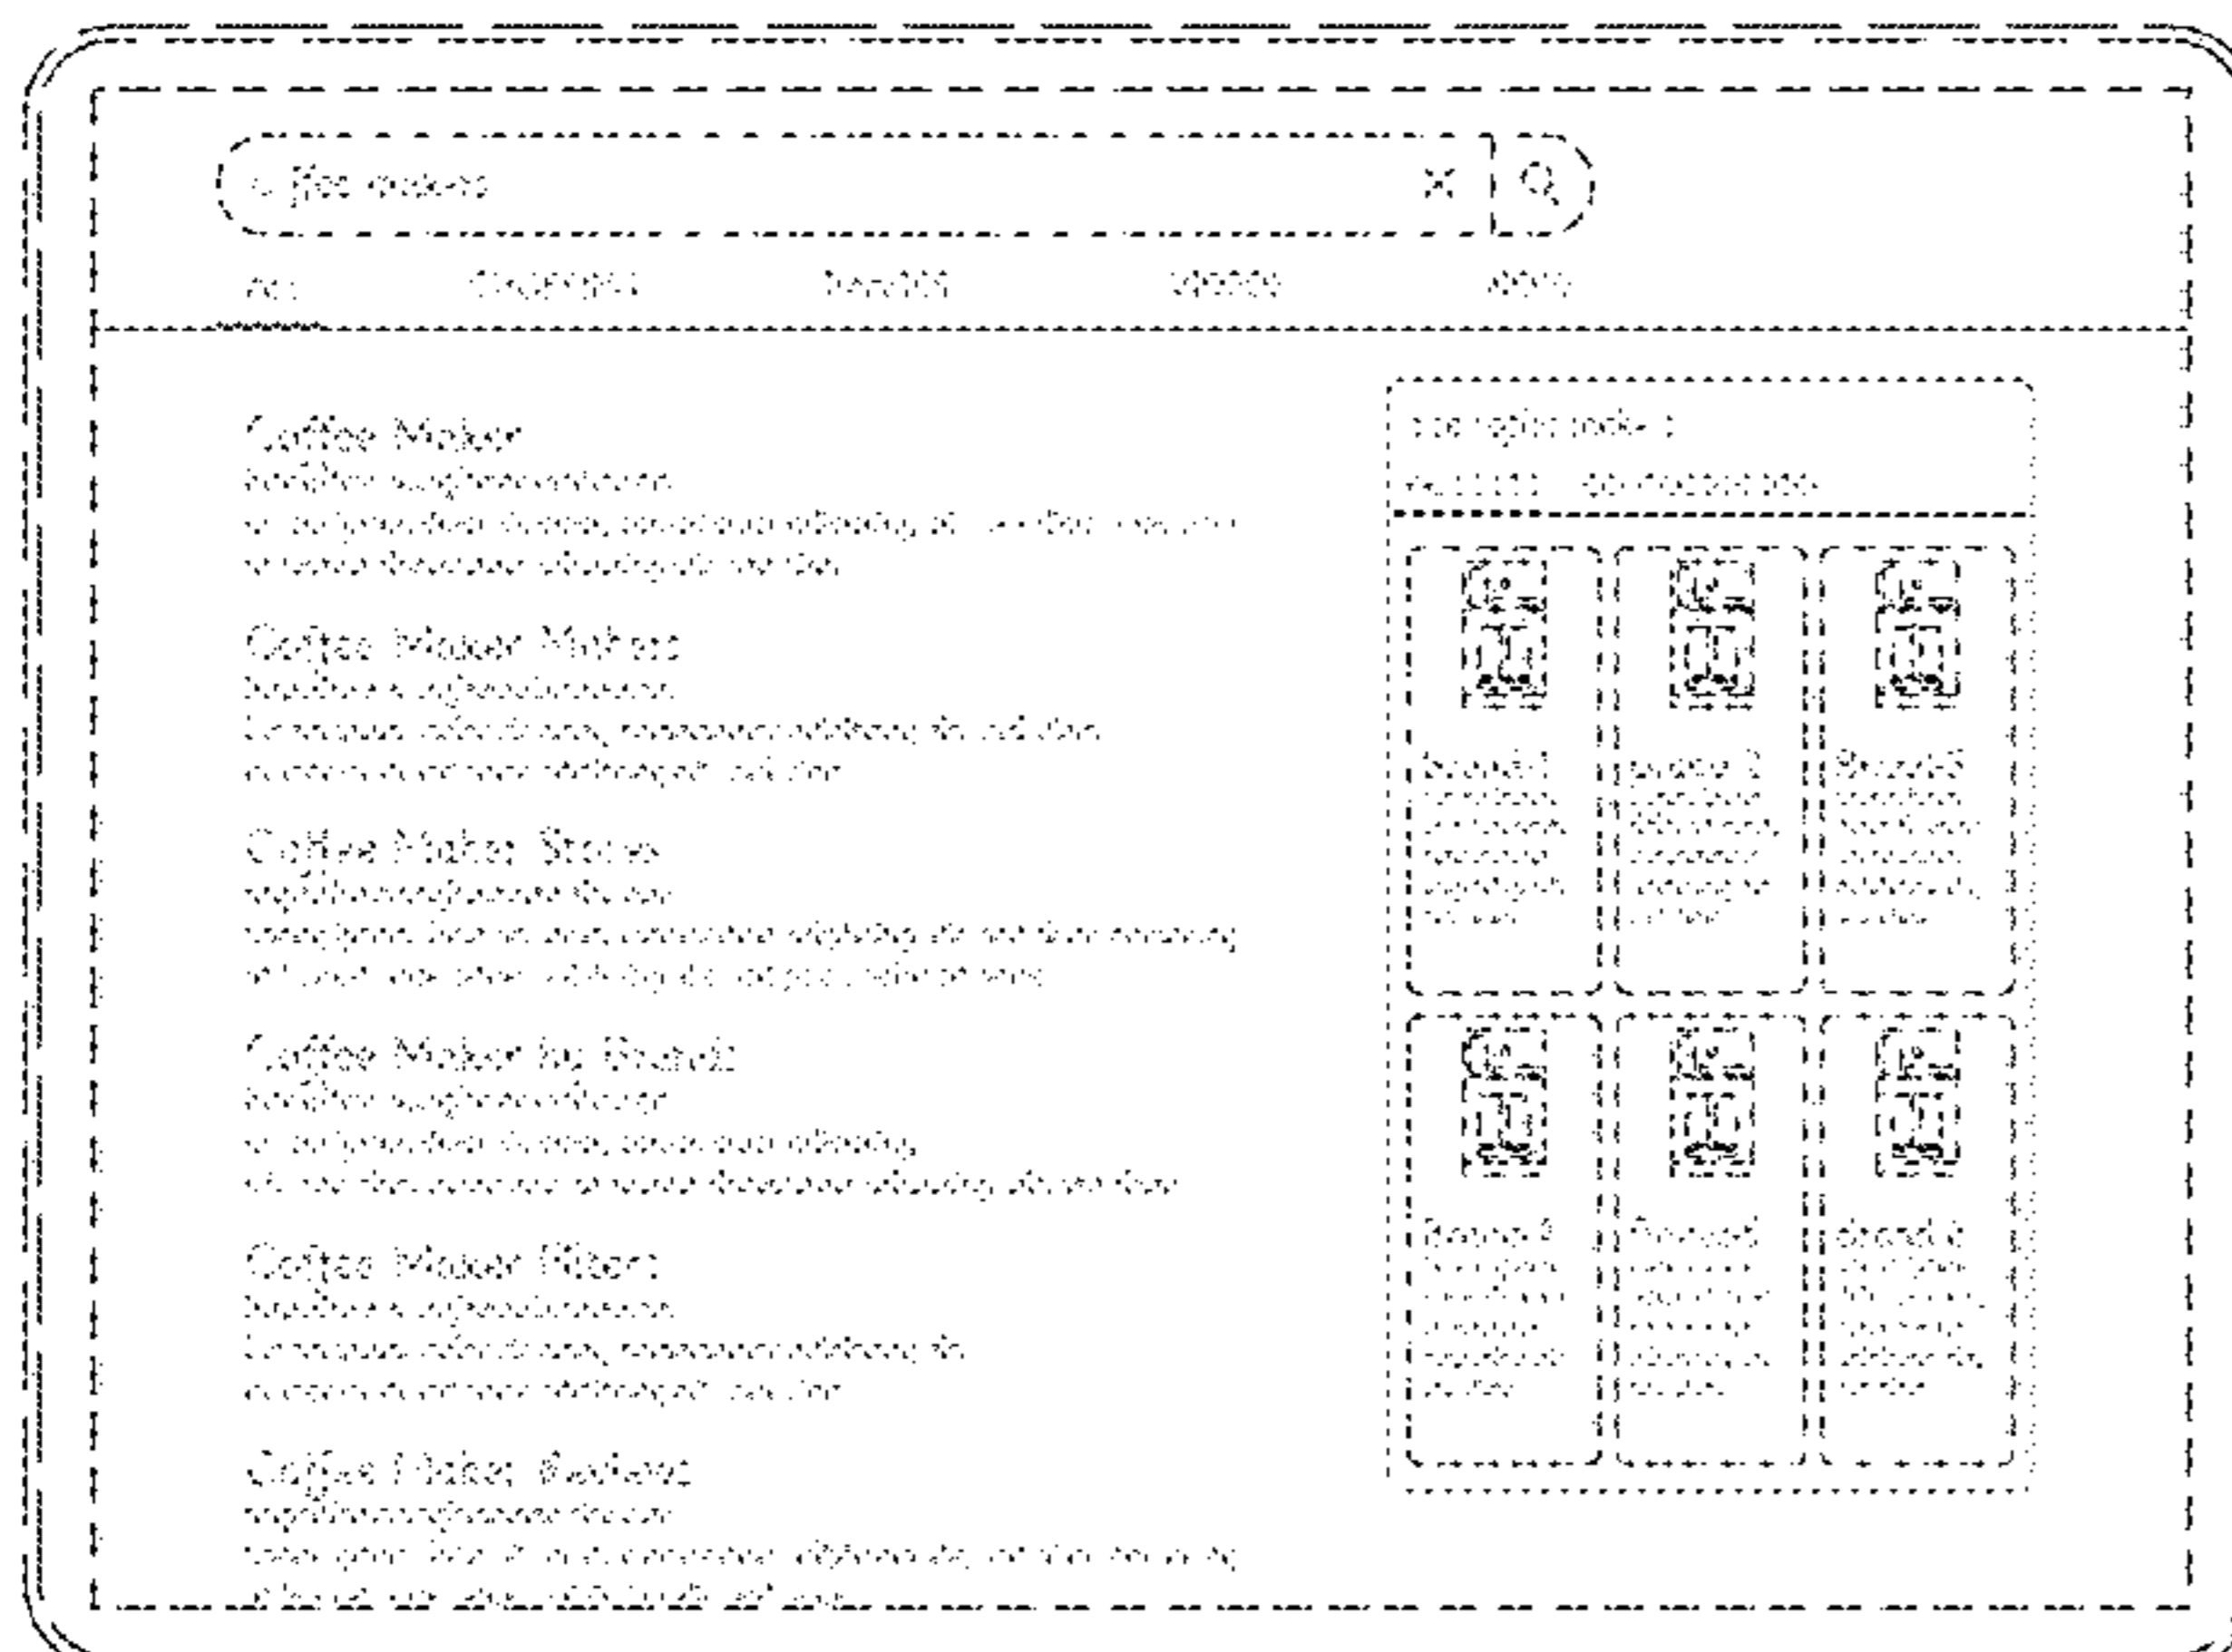

FIG. 3 is a front view of a first image in a sequence according to a second embodiment of our design for a display screen with transitional graphical user interface; and FIG. 4 is a front view of a second image in the sequence thereof.

FIG. 5 is a front view of a first image in a sequence according to a third embodiment of our design for a display screen with transitional graphical user interface; and, FIG. 6 is a front view of a second image in the sequence thereof.

The appearance of the transitional image transitions between the images shown in FIGS. 1-2, 3-4 and 5-6, respectively. The process or period in which one image transitions to another forms no part of the claimed design.

The shading is part of the claimed design. The outermost broken lines illustrate the electronic device, the broken line at the perimeter of the figure illustrates the display screen and a boundary, the remaining broken lines illustrate portions of the transitional graphical user interface. None of the broken lines form part of the claimed design.

1 Claim, 6 Drawing Sheets
