The ornamental design for a display panel or screen with an animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first embodiment of a display panel or screen with a first image of an animated graphical user interface showing my new design; FIG. 2 is a second image thereof; and FIG. 3 is a third image thereof.

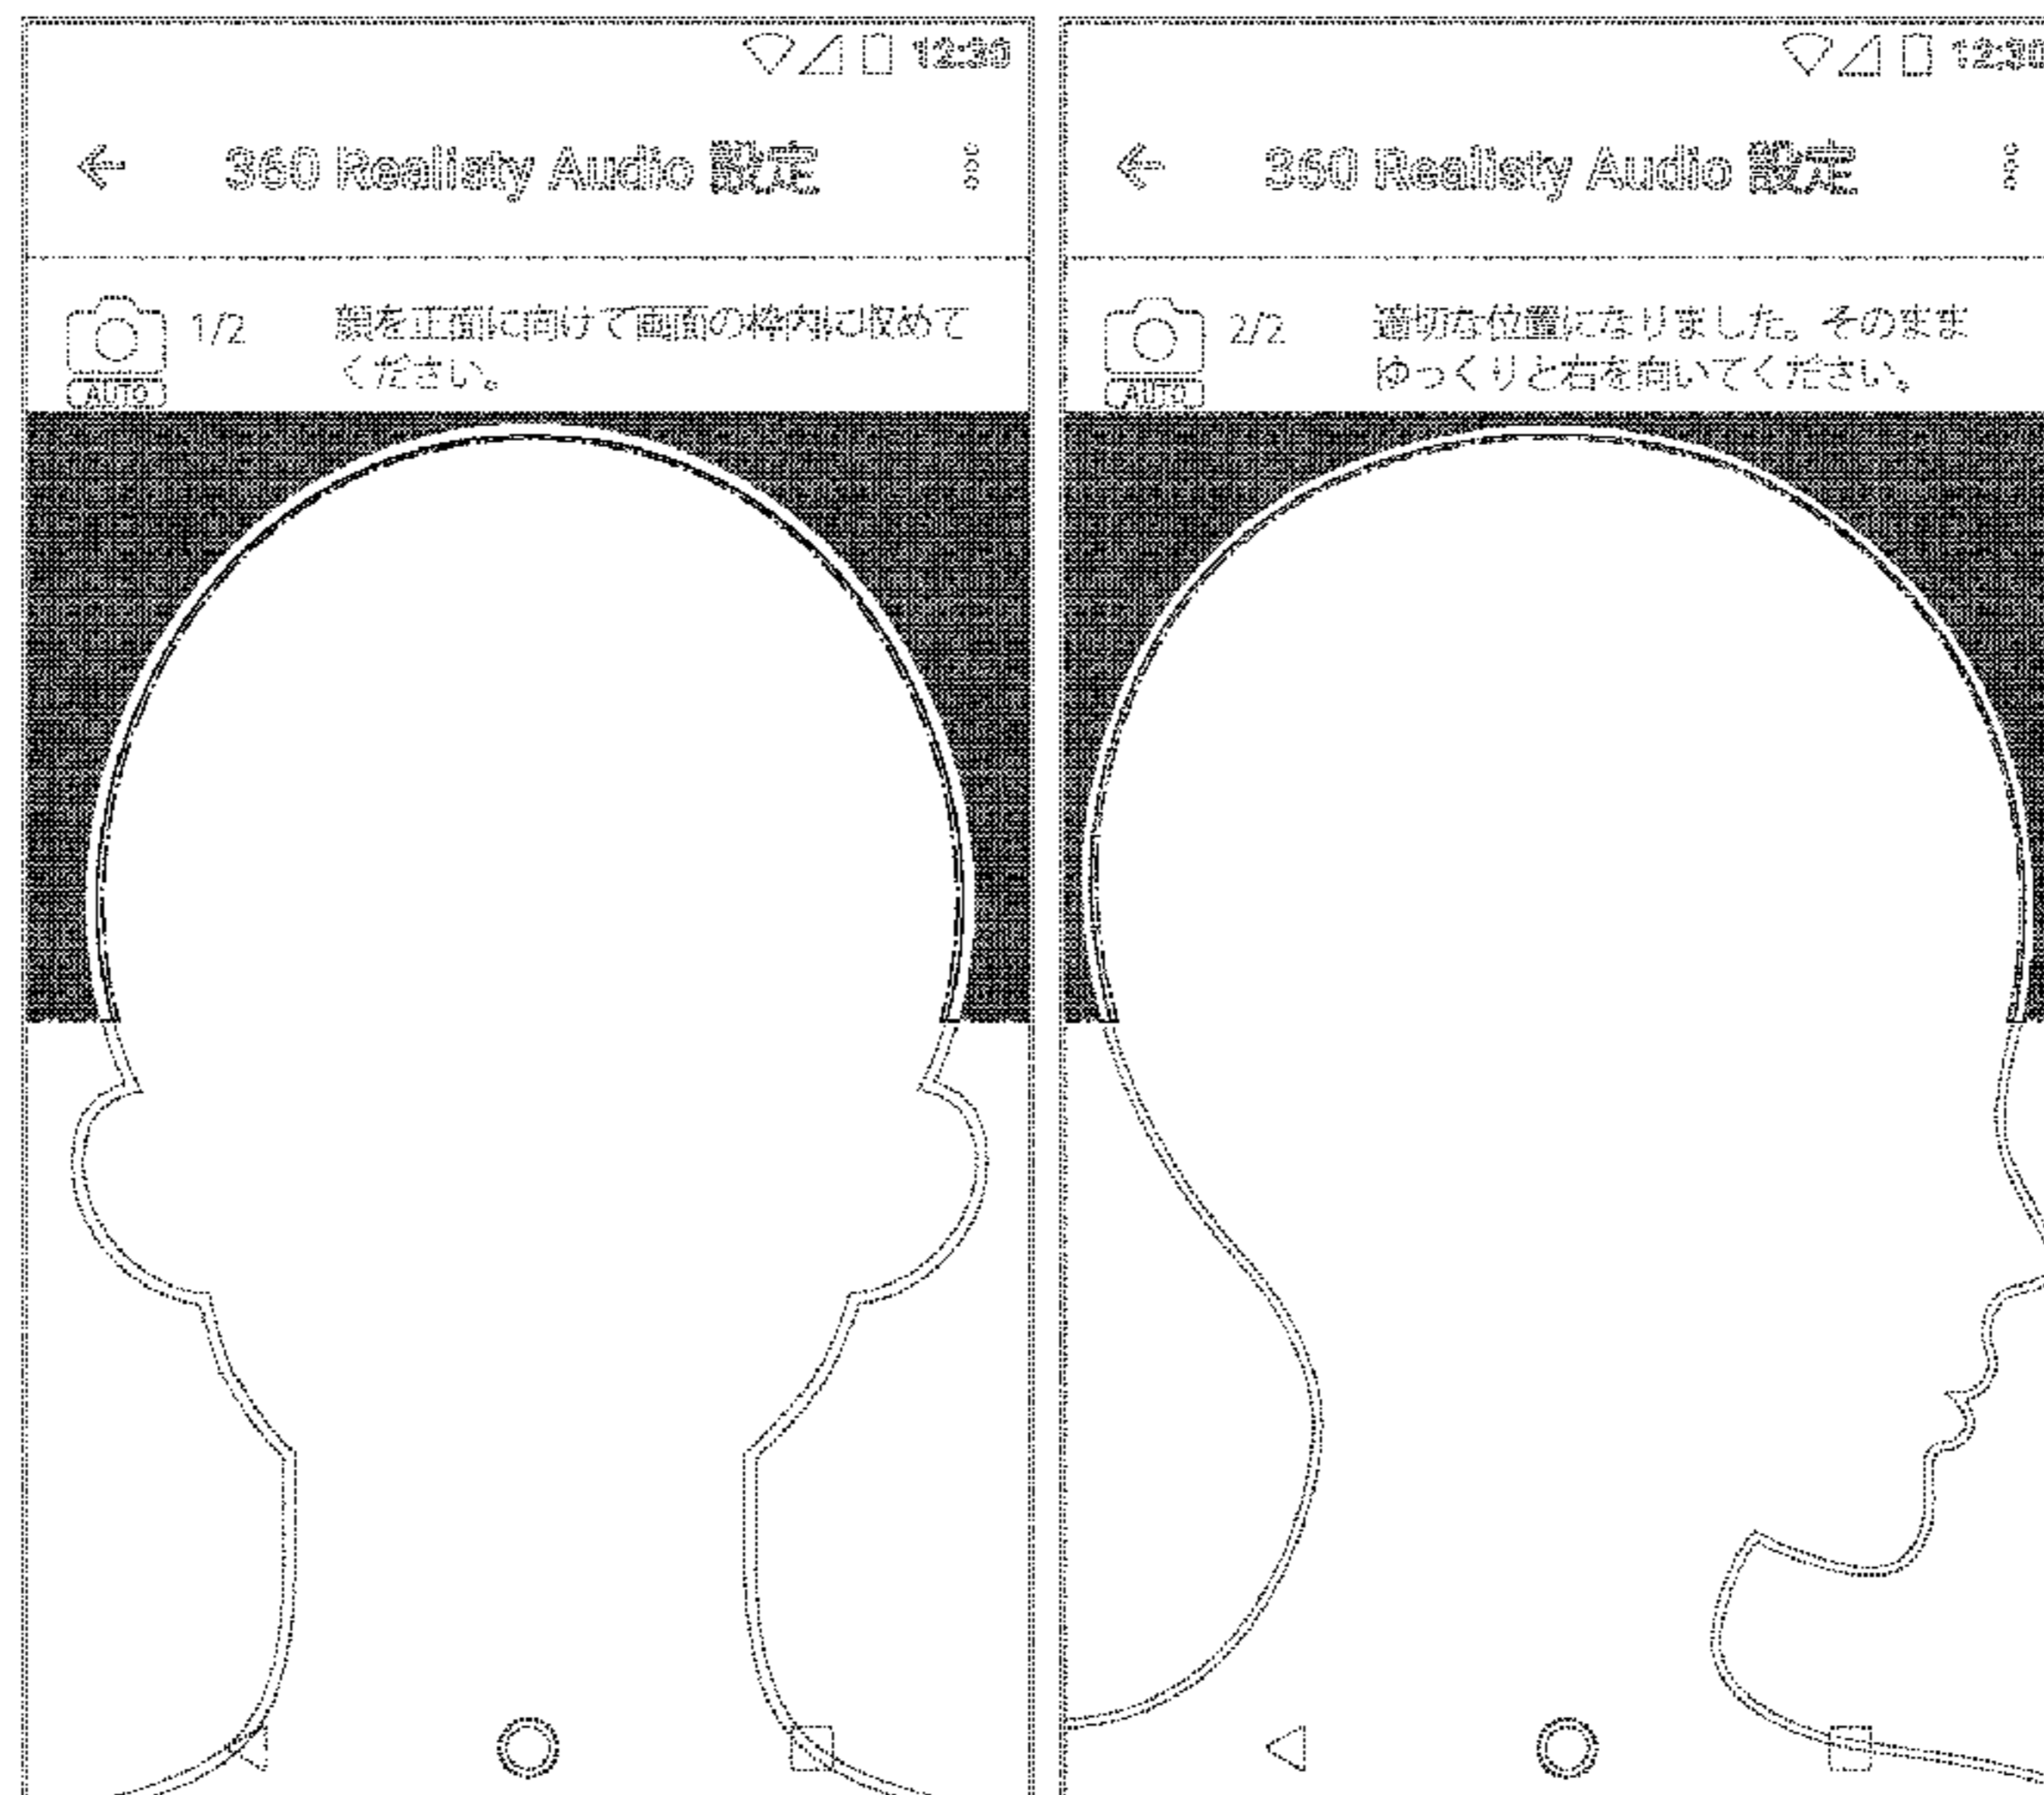

FIG. 4 is a front view of a second embodiment of a display panel or screen with a first image of an animated graphical user interface showing my new design; FIG. 5 is a second image thereof; and FIG. 6 is a third image thereof.

FIG. 7 is a front view of a third embodiment of a display panel or screen with a first image of an animated graphical user interface showing my new design; FIG. 8 is a second image thereof; and FIG. 9 is a third image thereof.

FIG. 10 is a front view of a fourth embodiment of a display panel screen with a first image of an animated graphical user interface showing my new design; and FIG. 11 is a second image thereof; and FIG. 12 is a third image thereof.

The appearance of an image sequentially transitions to another between FIGS. 1-3, FIGS. 4-6, FIGS. 7-9 and FIGS. 10-12, respectively. The process or period in which an image transitions to another forms no part of the claimed design. The broken lines illustrating the display panel or screen with an animated graphical user interface form no part of the claimed design. Dot-dash broken lines show the bounds of the claimed design and form no part thereof.
