FIG. 1 is a side perspective of a bottle carrier and support, indicating a central support structure with brackets configured to hold a sports bottle.

FIG. 2 is a side perspective view of FIG. 1, showing a plurality of brackets, with the top removed.

FIG. 3 is a side perspective view of a mesh bag that may be positioned within the central support.

FIG. 4 is a bottom plan view of the bottle carrier and support of FIG. 1 without a base ring positioned along the base.

FIG. 5 is a top plan view of the bottle carrier and support of FIG. 1 with a base ring positioned along the base and viewable through the central portion of the bottle carrier.

FIG. 6 is a side perspective view of the mesh bag of FIG. 3 being positioned within a central support structure, prior to assembly of brackets thereto.

FIG. 7 is an exploded perspective view of one embodiment of the central support structure of FIG. 6.

FIG. 8 is a side perspective view of the bottle support and carrier of FIGS. 1 and 2, showing optional handle removed; and,

FIG. 9 is a side perspective view of two bottle carriers and supports described herein in a stacked configuration.

The shading provided on the figures is intended to provide perspective only and forms no part of the invention. The broken lines showing is included for the purpose of illustrating environment and forms no part of the claimed design.
