(57) **CLAIM**

The ornamental design for a tire, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a tire taken from a front and a first side of the tire;
FIG. 2 is a front view thereof;
FIG. 3 is a side view of the first side thereof;
FIG. 4 is an enlarged, partial view of the first side thereof;
FIG. 5 is a perspective view taken from the front and a second side thereof;
FIG. 6 is a side view of the second side thereof; and,
FIG. 7 is an enlarged, partial view of the second side thereof.
The top and bottom views are the same as the front view of FIG. 2 based on the repeating nature of the tread design pattern throughout the circumference of the tire. The broken lines and the region between the broken lines defining the inner beads and the first and second sidewalls depict subject matter that forms no part of the claimed tire design and are included for the purpose of illustrating the full tire. Likewise, the tire interior forms no part of the claim.
