(57) **CLAIM**

The ornamental design for notebook paper, as shown and described.

DESCRIPTION

FIG. 1 is a front elevation view of a first embodiment of notebook paper of conventional thickness showing our new design, the opposite side being the same or plain.
FIG. 2 is a front elevation view of a second embodiment of notebook paper of conventional thickness showing our new design, the opposite side being the same or plain.
FIG. 3 is a front elevation view of a third embodiment of notebook paper of conventional thickness showing our new design, the opposite side being the same or plain; and,
FIG. 4 is a front elevation view of a fourth embodiment of notebook paper of conventional thickness showing our new design, the opposite side being the same or plain.
The outside dashed line shown in the figures define the bounds of the notebook paper and form no part thereof.

1 Claim, 4 Drawing Sheets

Fig. 1

The figure shows a large rectangular grid. It is bounded by a dashed line on the outside and a solid line on the inside. The grid consists of 20 horizontal rows and 2 vertical columns. The top and bottom rows are separated from the rest of the grid by thicker solid lines. The central area is filled with a light gray stippled pattern.

Fig. 3
