CLAIM

The ornamental design for a display screen with an animated graphical user interface for power control system, as shown and described.

DESCRIPTION

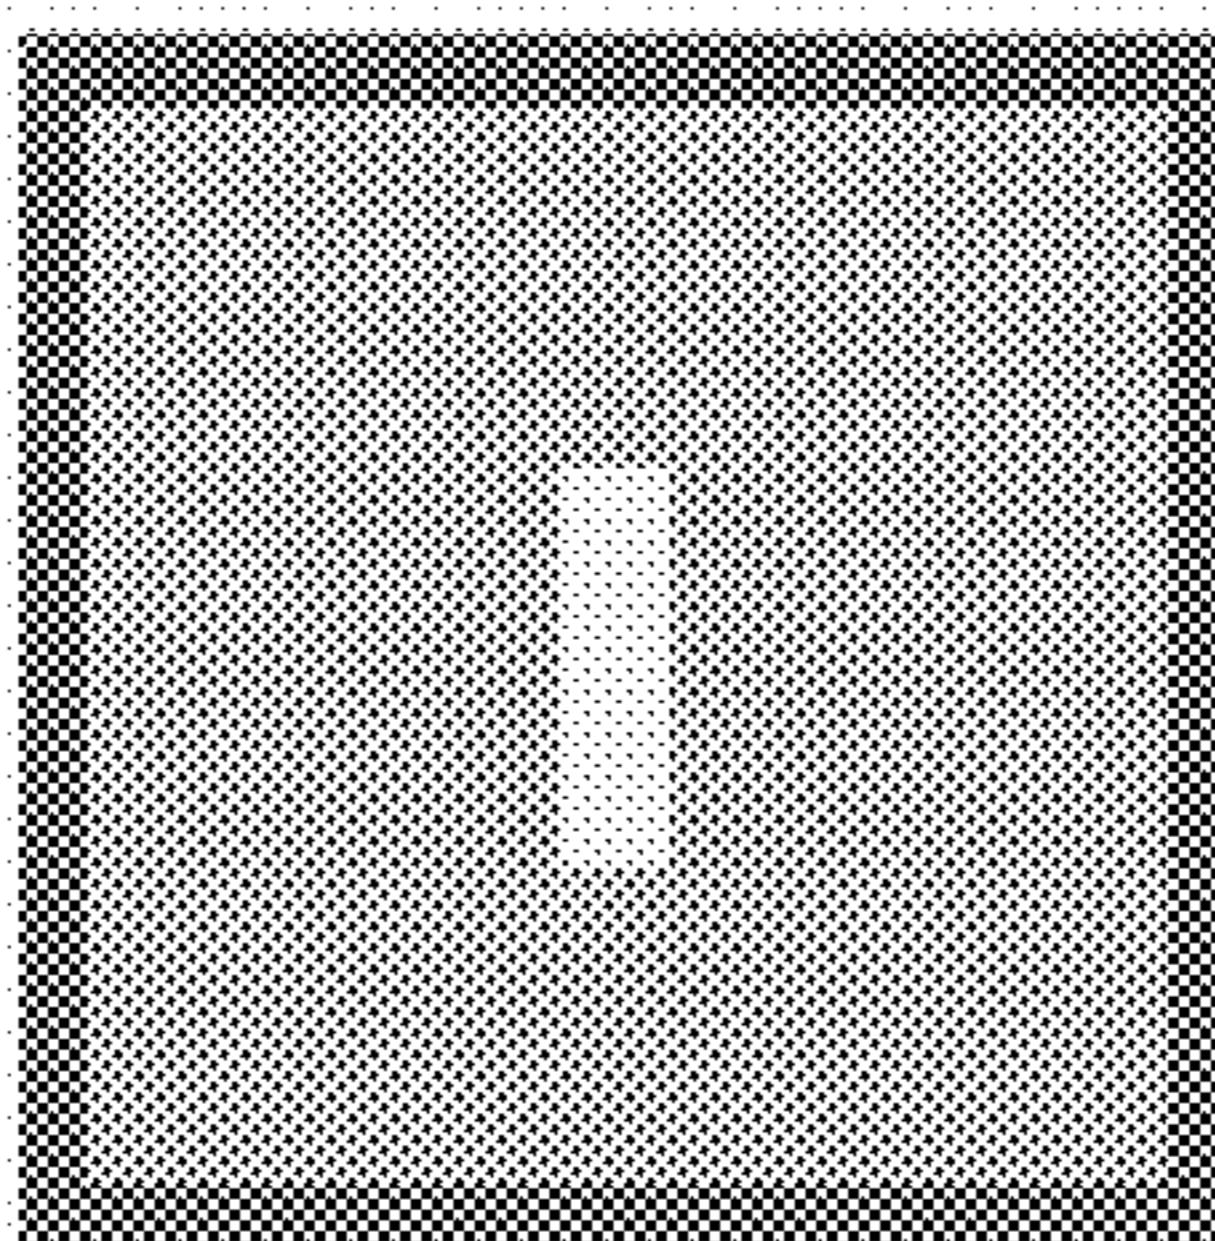

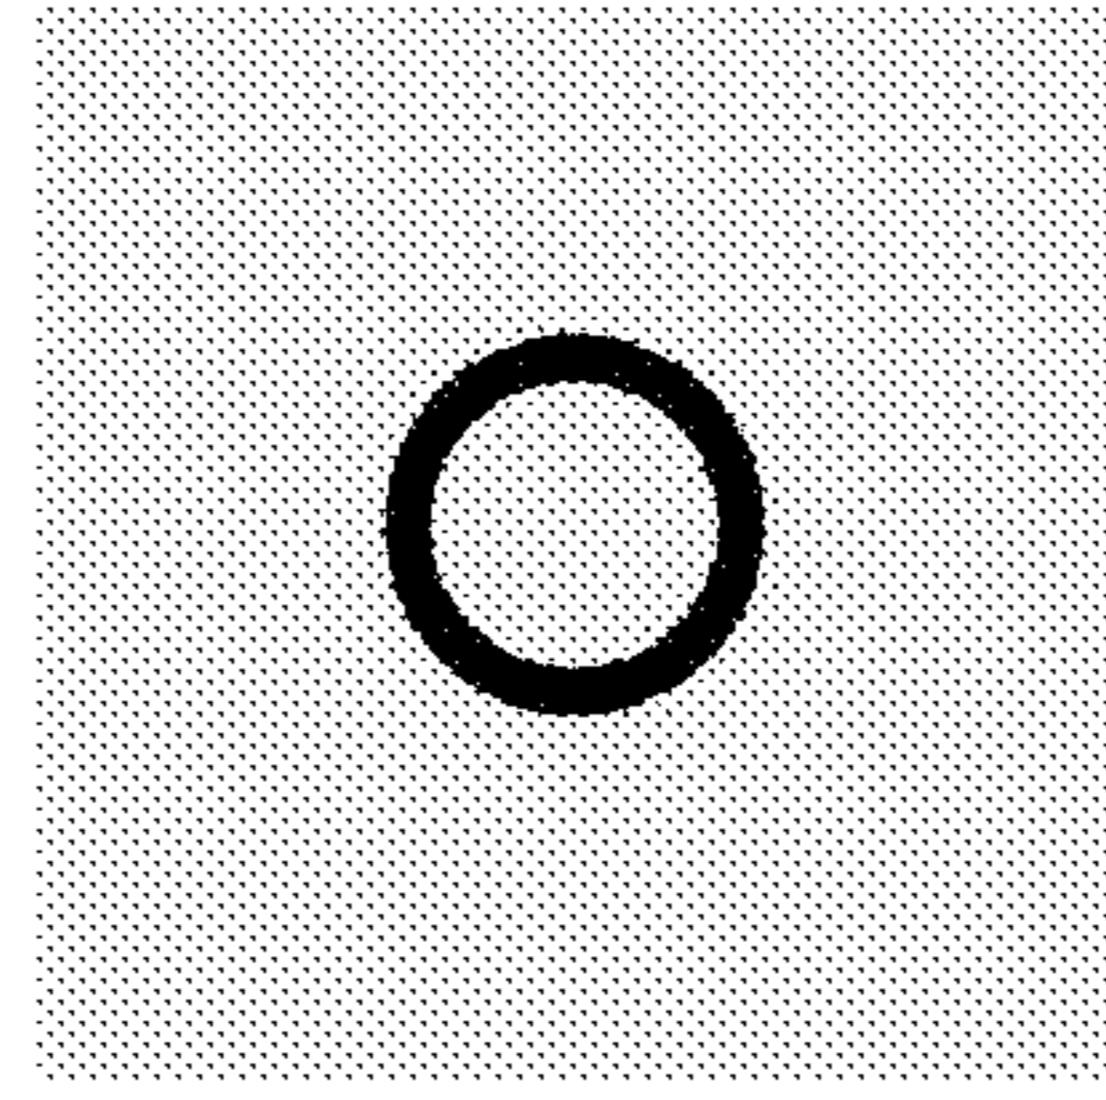

The file of this patent contains at least one drawing/photograph executed in color. Copies of this patent with color drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a first image of a first embodiment of a display screen with an animated graphical user interface for power control system showing our new design; FIG. 2 is a front view of a second image thereof; FIG. 3 is a front view of a first image of a second embodiment of a display screen with an animated graphical user interface for power control system; and, FIG. 4 is a front view of a second image thereof.

The appearance of the animated images sequentially transitions between the images shown in FIGS. 1-2 and between the images shown in FIGS. 3-4. The process or period in which one image transitions to another forms no part of the claimed design.

The dashed lines and broken text and graphics illustrate portions of the animated graphical user interface that form no part of the claimed design. The dash-dot lines indicate the boundary of the display screen and form no part of the claim.
