(57) **CLAIM**

The ornamental design for a display screen or portion thereof having an animated graphical user interface for dynamically formatting elements of a process control editor, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen or portion thereof having an animated graphical user interface for dynamically formatting elements of a process control editor showing our new design;

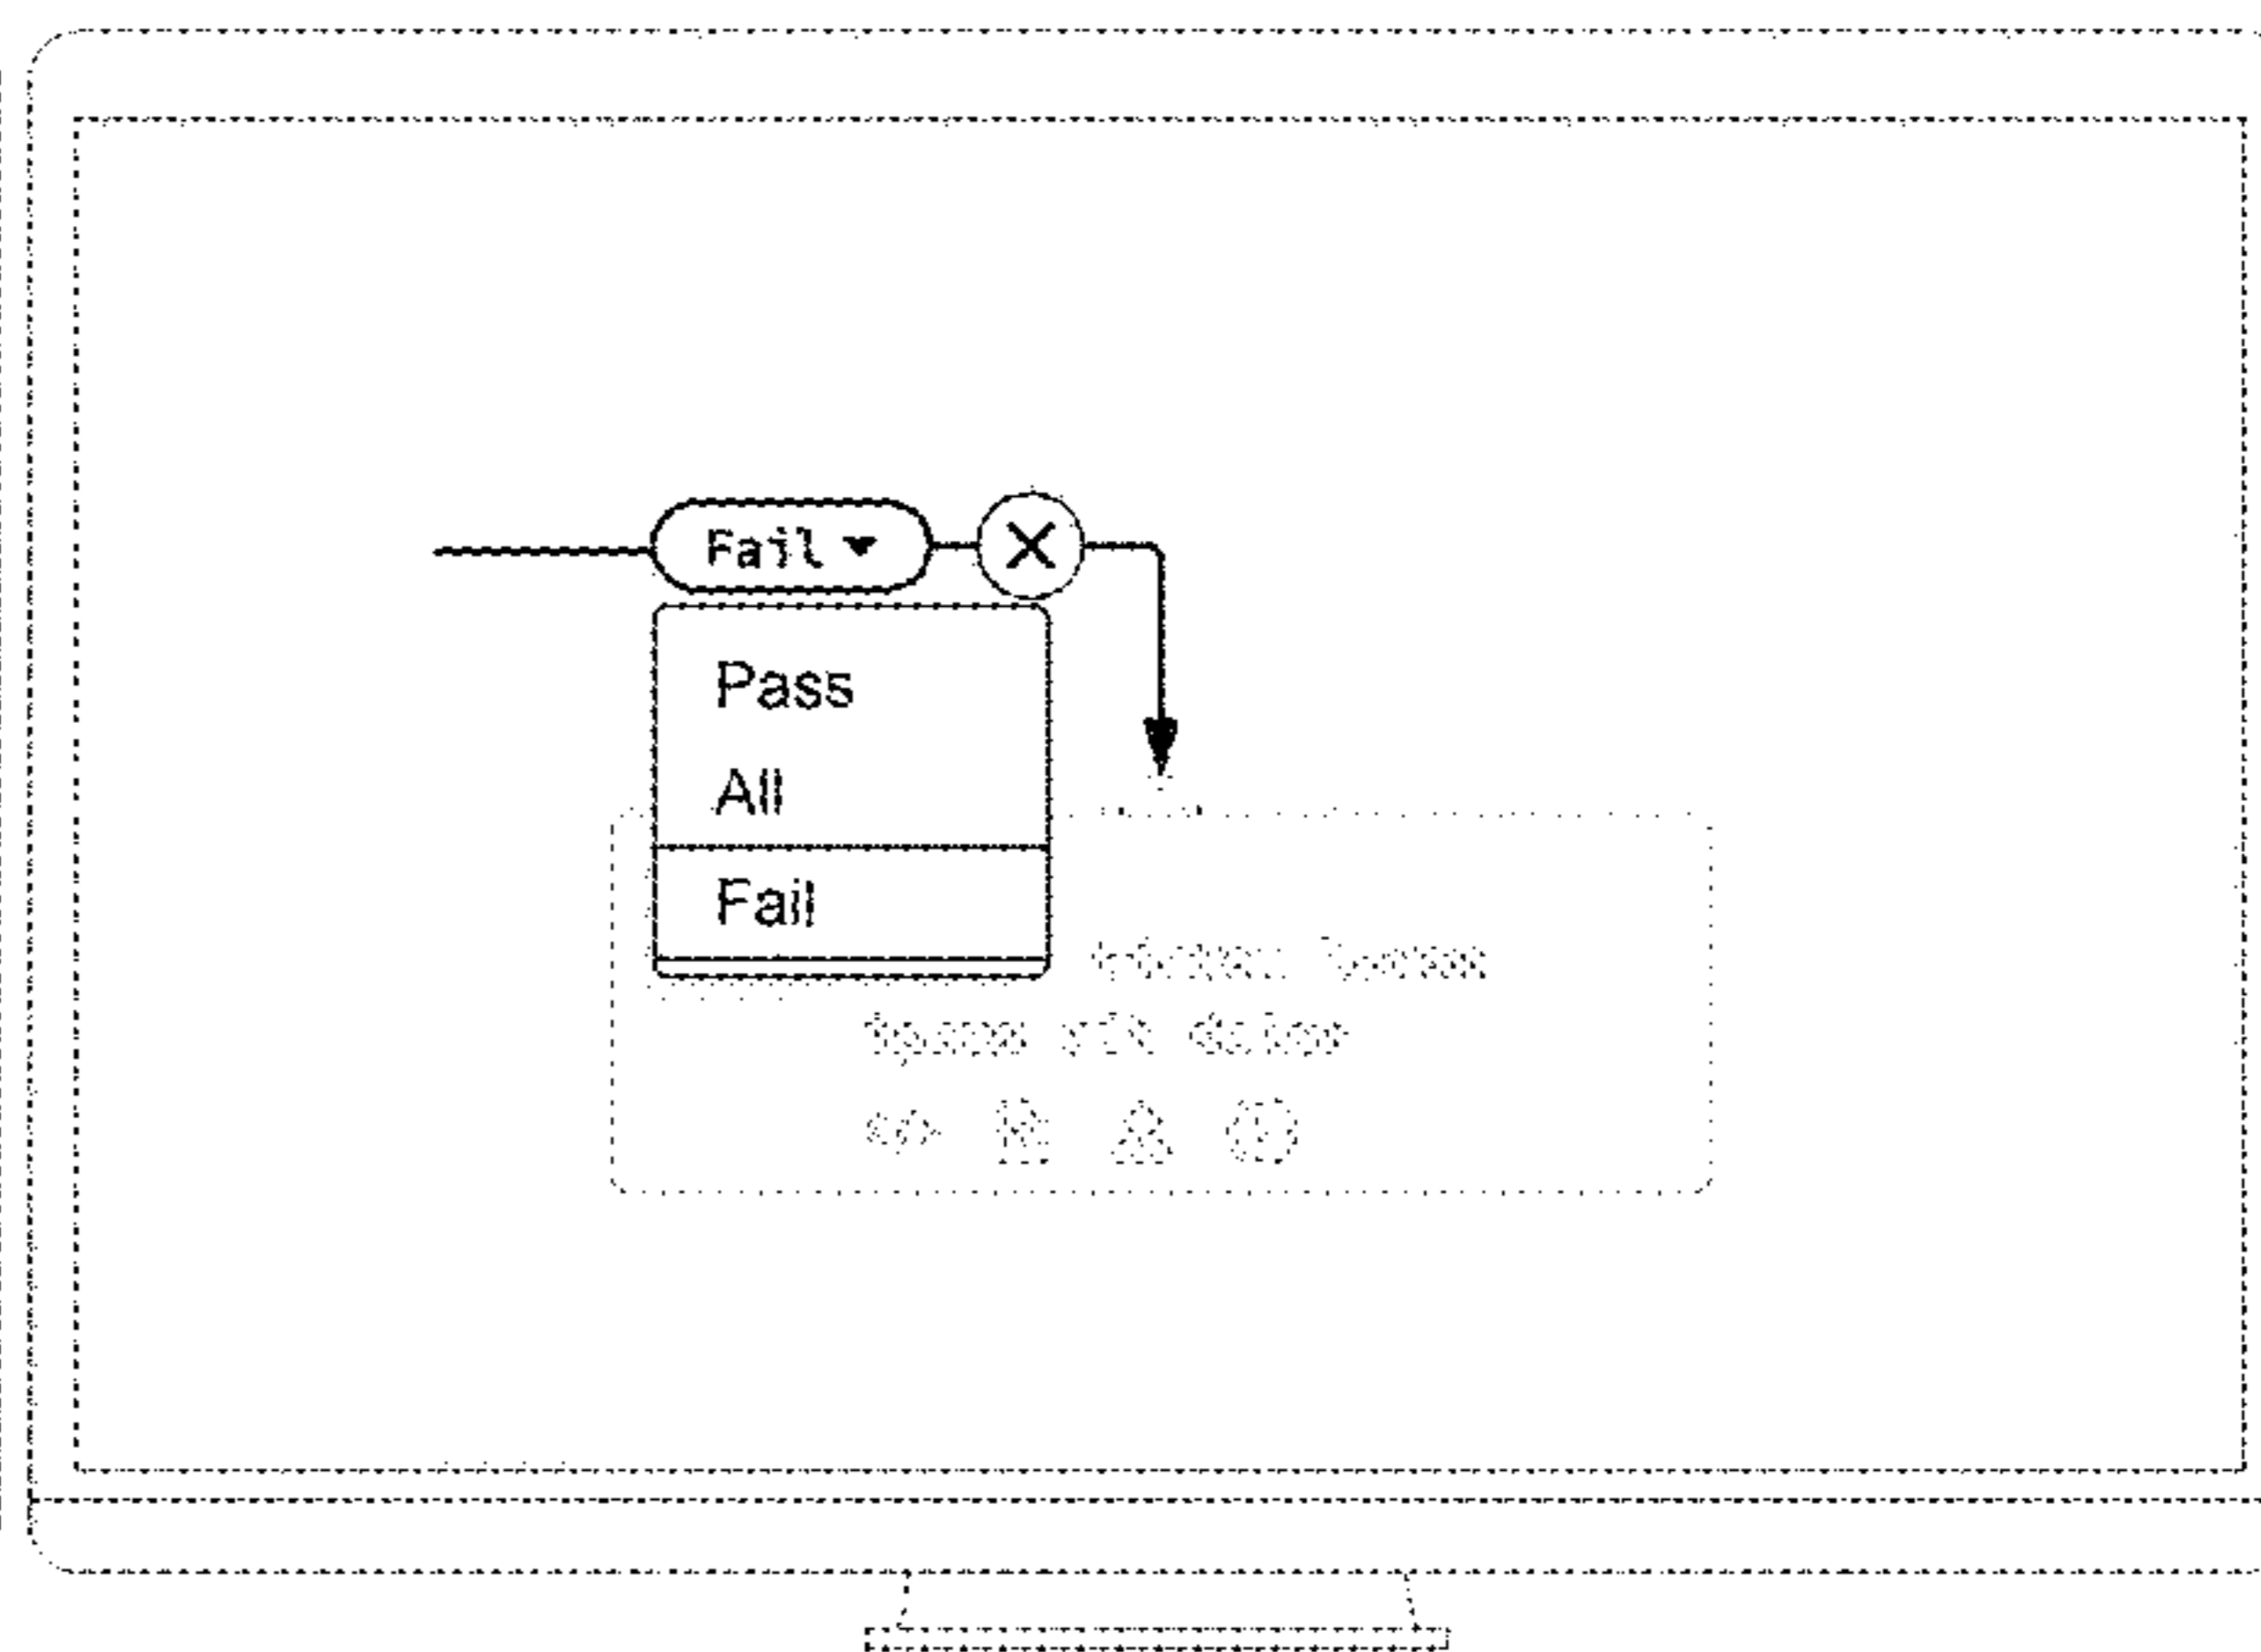

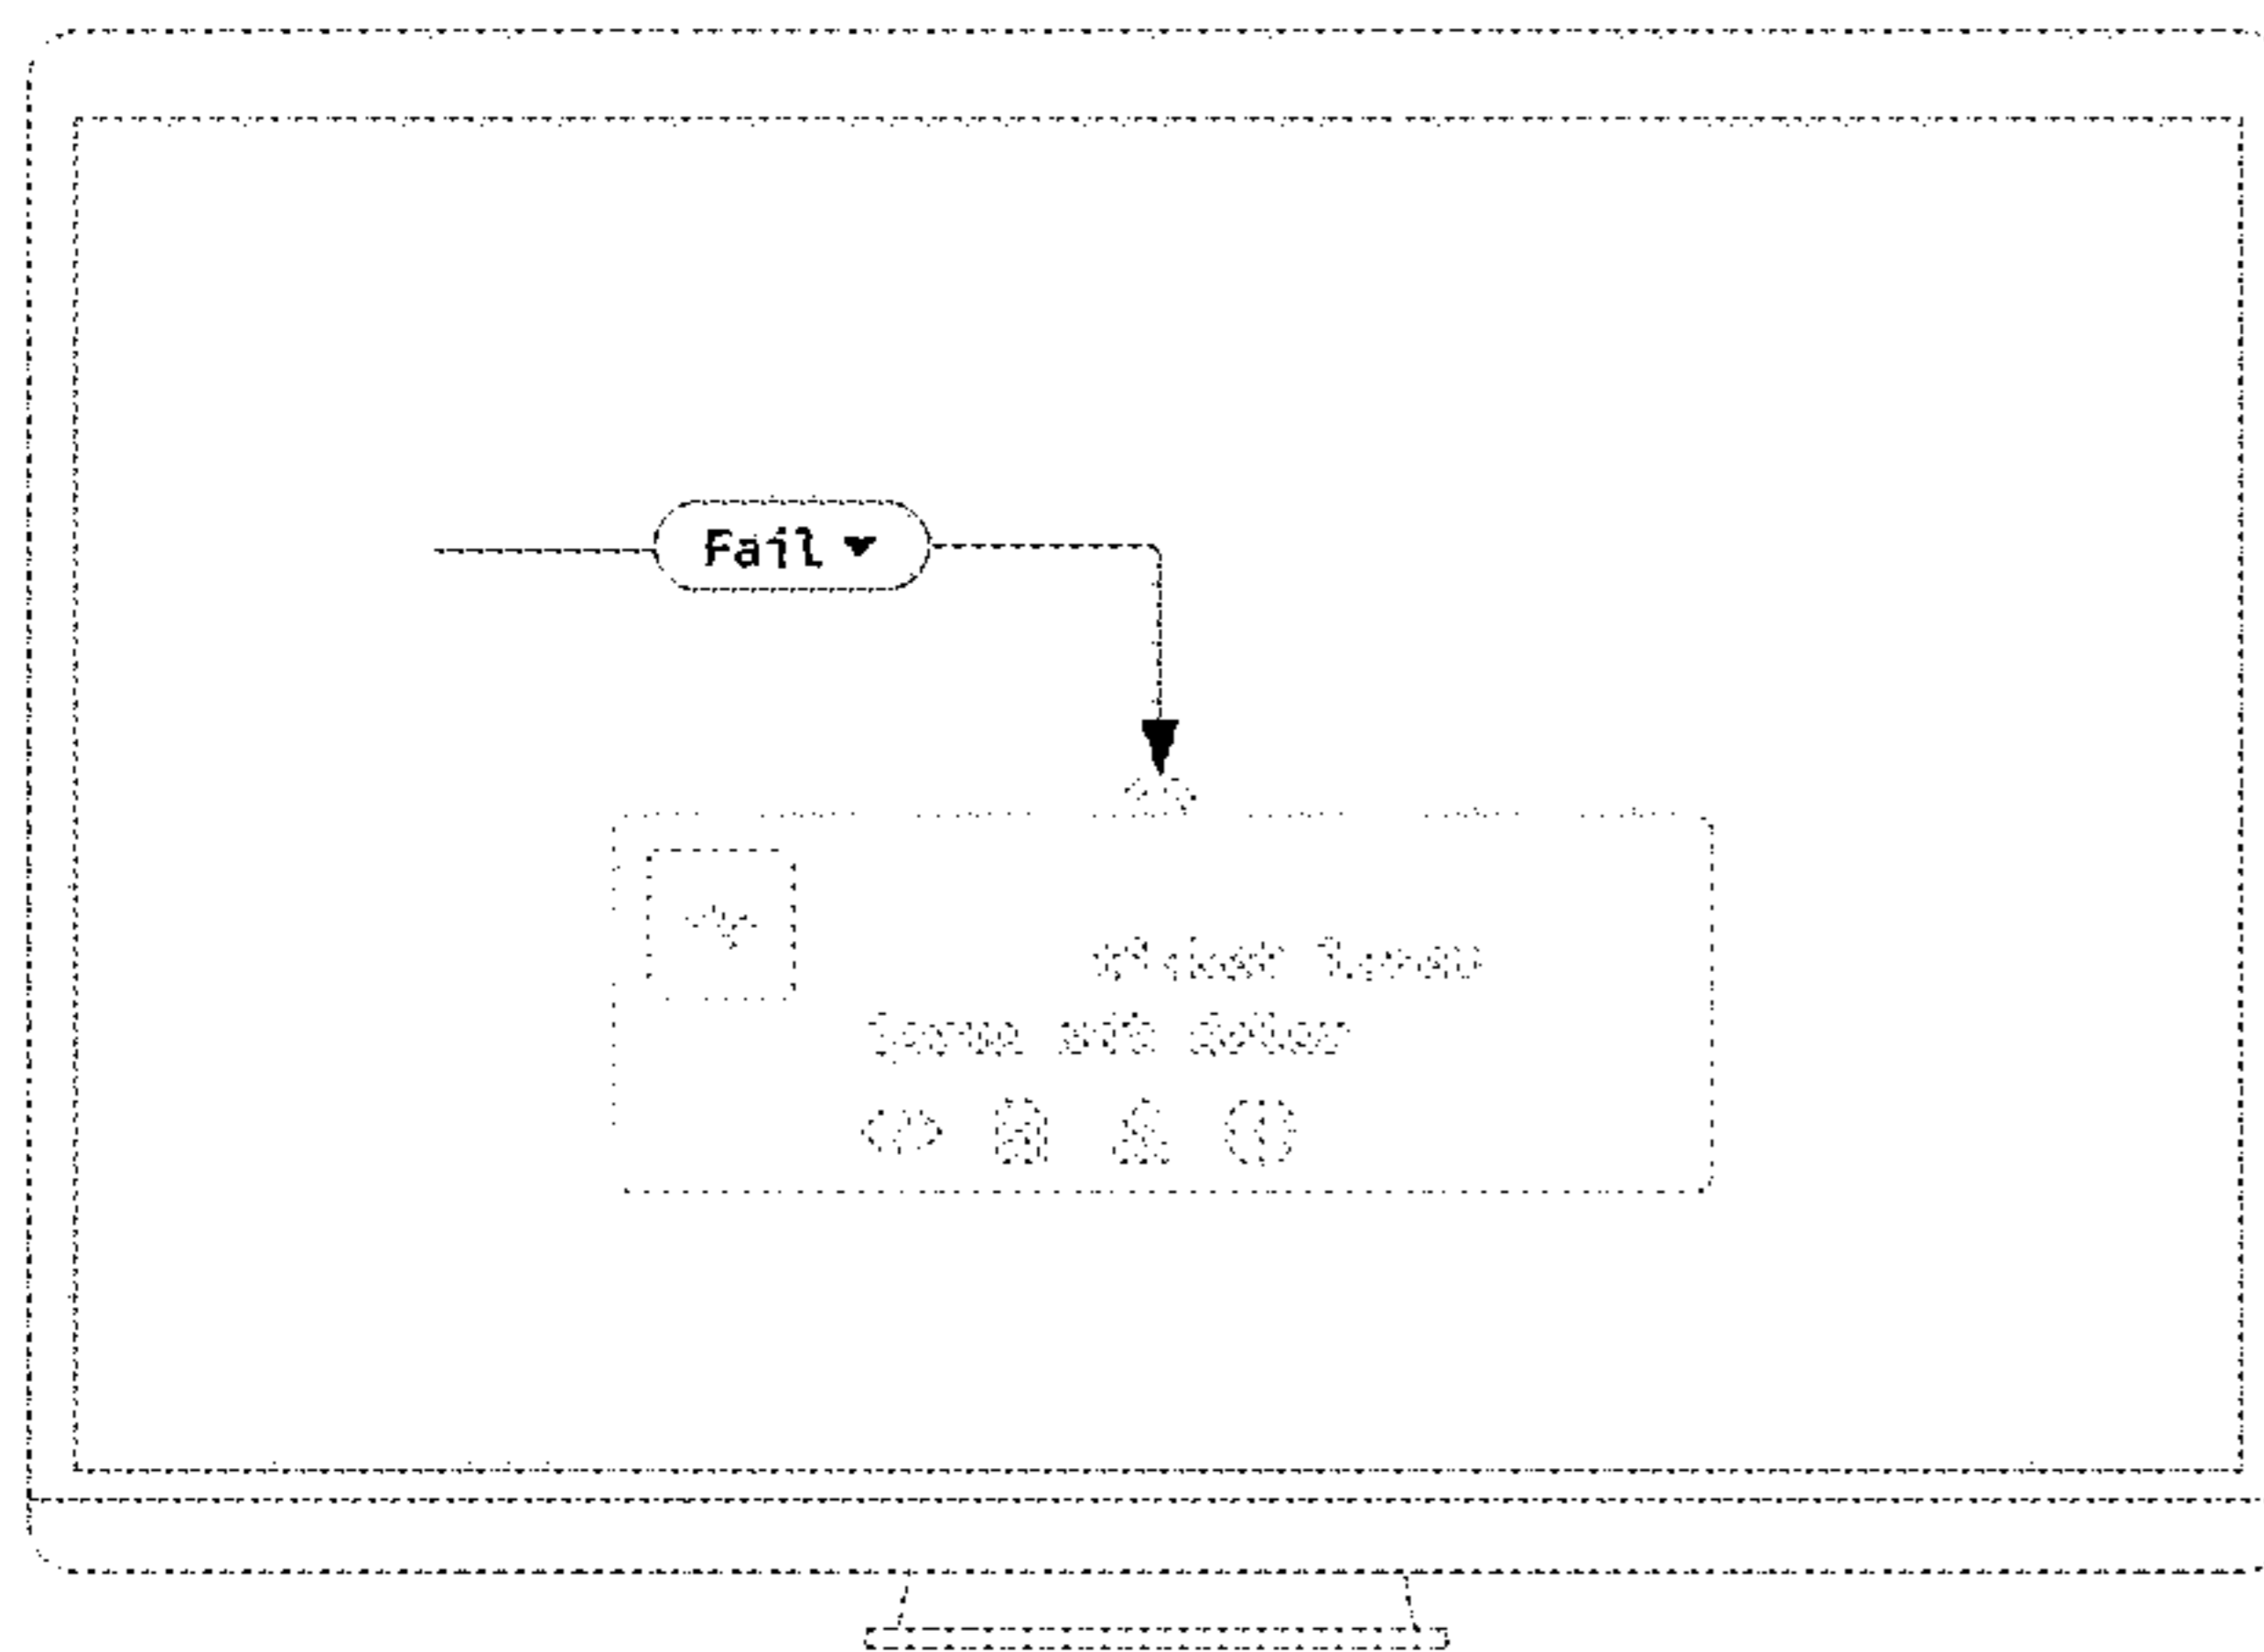

FIG. 2 is a front view of a second image thereof; and,

FIG. 3 is a front view of a third image thereof.

The outermost broken lines illustrate an electronic device, the broken line at the periphery of the graphical user interface illustrates the display screen or portion thereof, and the remaining broken line showing of text, numbers and graphical images illustrate portions of the graphical user interface. None of the broken lines form part of the claimed design.

The texts, symbols, and other graphical images presented in broken lines are illustrative, only presented to show an exemplary layout within the display screen, and do not form part of the claimed design.
