(57) **CLAIM**
The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with transitional graphical user interface showing a first image in a sequence of the first embodiment according to the claimed design; FIG. 2 is a front view of a second image thereof; FIG. 3 is a front view of a display screen with transitional graphical user interface showing a first image in a sequence of a second embodiment according to the claimed design; and, FIG. 4 is a front view of a second image thereof. The appearance of the transition is sequential from FIG. 1 to FIG. 2 in the first embodiment and from FIG. 3 to FIG. 4 in the second embodiment. The process or period in which an image transitions to another image forms no part of the claimed design. There is shading which is part of the claimed design. The outermost broken line illustrates the display screen and a boundary and the remaining broken lines illustrate portions of the transitional graphical user interface. None of the broken lines form part of the claimed design.

1 Claim, 4 Drawing Sheets
