(57) **CLAIM**

The ornamental design for a display screen with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with graphical user interface showing a first image in a sequence of the graphical user interface according to the claimed design.

FIG. 2 is a front view of the display screen with graphical user interface showing a second image in the sequence of the graphical user interface.

FIG. 3 is a rear view of the display screen with graphical user interface.

FIG. 4 is a left side view of the display screen with graphical user interface.

FIG. 5 is a right side view of the display screen with graphical user interface.

FIG. 6 is a top view of the display screen with graphical user interface; and,

FIG. 7 is a bottom view of the display screen with graphical user interface.

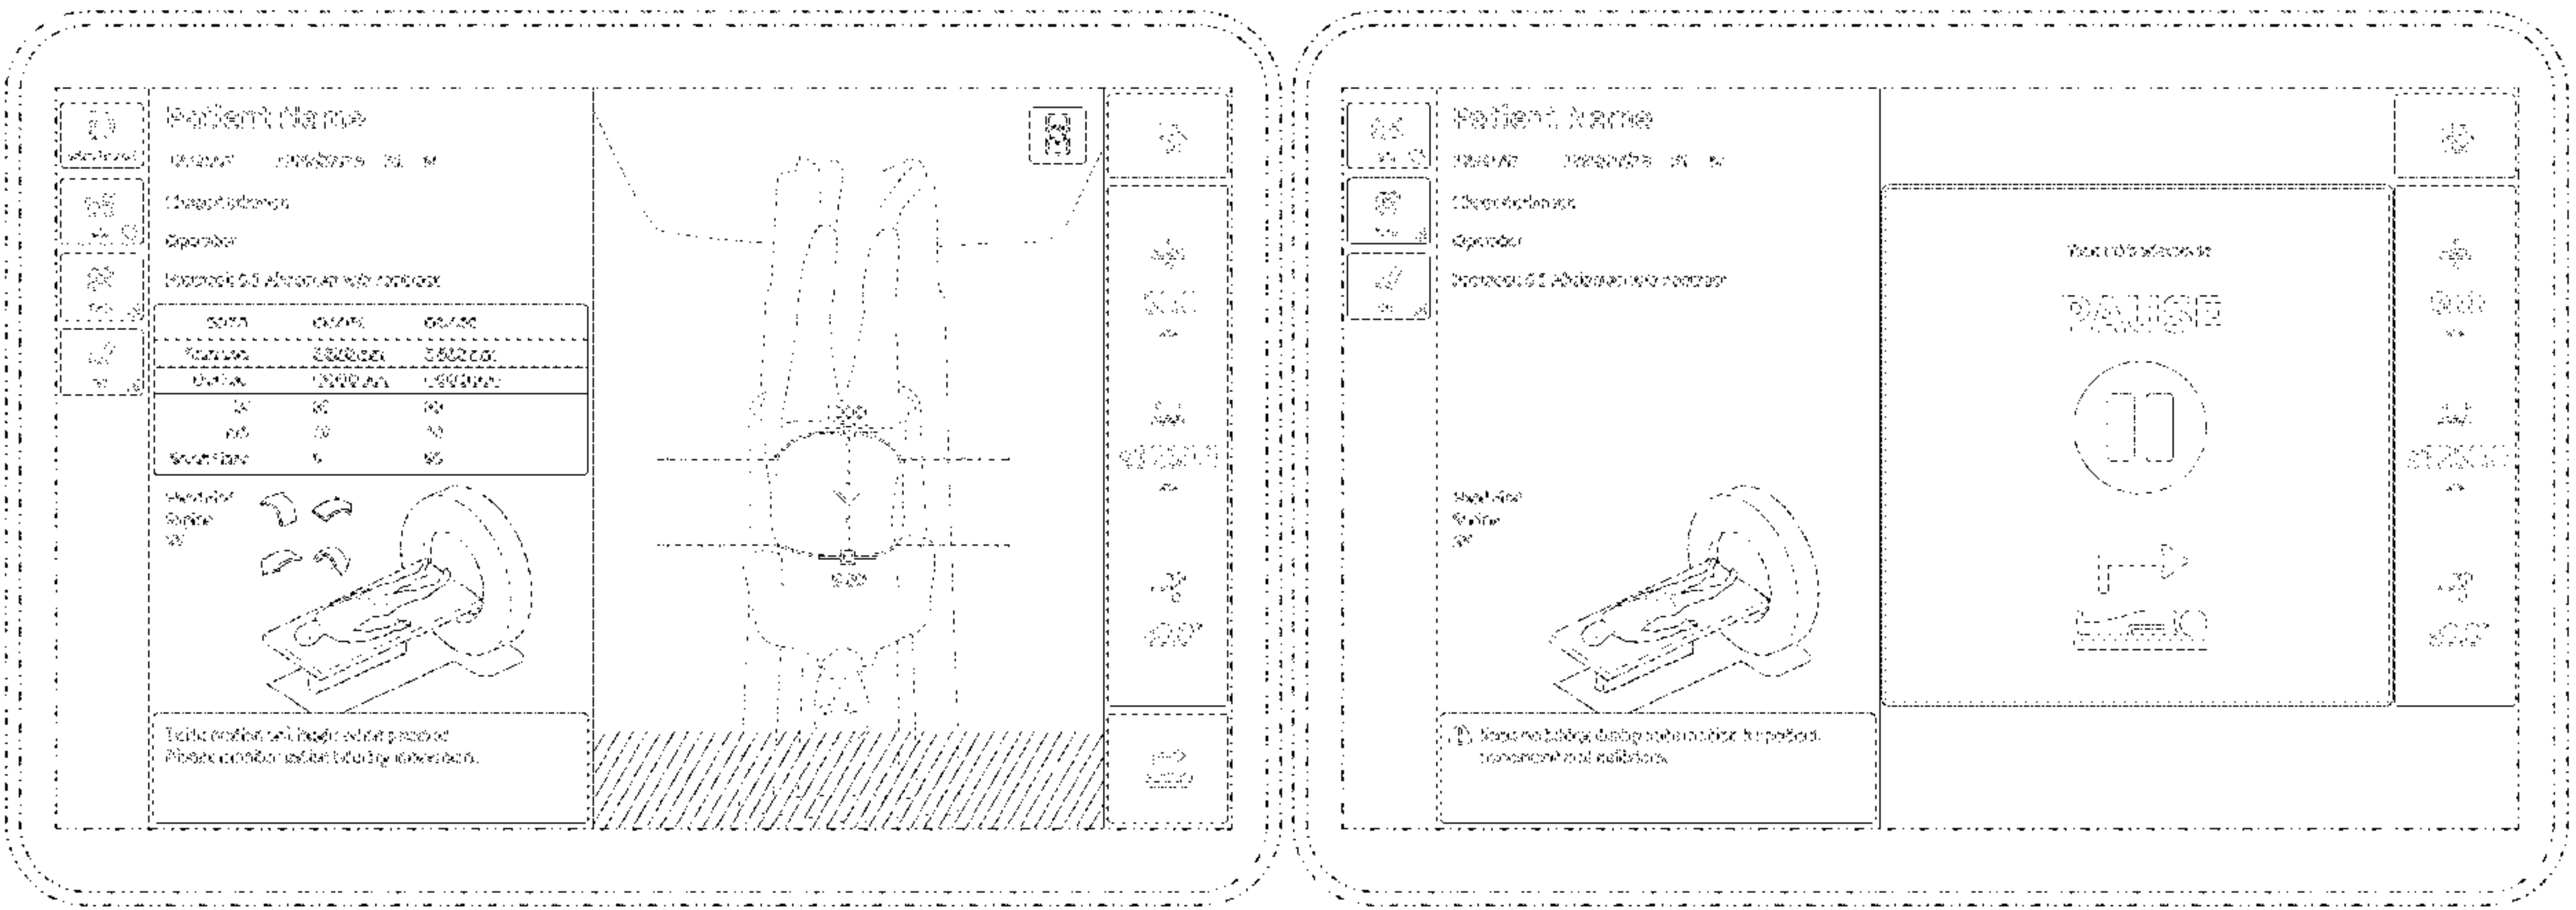

The dash-dot-dot broken lines in the drawings show a device with display screen, and form no part of the claimed design.

The dash-dash broken lines in the drawings showing the graphical user interface illustrate portions of the display screen with graphical user interface that form no part of the claimed design.

The outlined, broken line paths positioned across the patient image in FIG. 1 are claimed, but the patient image forms no part of the claimed design.

The appearance of the graphical user interface sequentially transitions between the images shown in FIGS. 1-2. The process or period in which an image transitions to another forms no part of the claimed design.
