(57) **CLAIM**

The ornamental design for posterior stabilizer for an osteotomy plate, as shown and described.

DESCRIPTION

3.-4. Posterior stabilizer for an osteotomy

The design comprises the features of shape and configuration of a posterior stabilizer for an osteotomy plate as shown in solid lines in the drawings; the drawings show two variants; Figures 3.1 to 3.8 show a first variant, Figures 4.1 to 4.8 show a second variant.

Figure 3.1 is a rear perspective view of a posterior stabilizer for an osteotomy plate in accordance with a second variant, extending posteriorly and laterally from the first embodiment of the osteotomy plate;

Figure 3.2 is a front perspective view of the posterior stabilizer shown in Figure 3.1;

Figure 3.3 is a rear elevation view of the posterior stabilizer shown in Figure 3.1;

Figure 3.4 is a front elevation view of the posterior stabilizer shown in Figure 3.1;

Figure 3.5 is a right-side elevation view of the posterior stabilizer shown in Figure 3.1;

Figure 3.6 is a left-side elevation view of the posterior stabilizer shown in Figure 3.1;

Figure 3.7 is a top plan view of the posterior stabilizer shown in Figure 3.1;

Figure 3.8 is a bottom plan view of the posterior stabilizer shown in Figure 3.1;

Figure 4.1 is a rear perspective view of the posterior stabilizer for an osteotomy plate in accordance with the second variant, mounted rearwardly to the first embodiment of the osteotomy plate;

(Continued)

Figure 4.2 is a front perspective view of the posterior stabilizer shown in Figure 4.1; Figure 4.3 is a rear elevation view of the posterior stabilizer shown in Figure 4.1; Figure 4.4 is a front elevation view of the posterior stabilizer shown in Figure 4.1; Figure 4.5 is a right-side elevation view of the posterior stabilizer shown in Figure 4.1; Figure 4.6 is a left-side elevation view of the posterior stabilizer shown in Figure 4.1; Figure 4.7 is a top plan view of the posterior stabilizer shown in Figure 4.1; and Figure 4.8 is a bottom plan view of the posterior stabilizer shown in Figure 4.1
In the reproductions, the broken lines depict portions of the posterior stabilizer for an osteotomy plate that form no part of the claimed design.
