(57) **CLAIM**

The ornamental design for a mobile phone having display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image of the display screen with transitional graphical user interface showing our new design;

FIG. 2 is a rear view thereof;

FIG. 3 is a left side view thereof;

FIG. 4 is a right side view thereof;

FIG. 5 is a top plan view thereof;

FIG. 6 is a bottom plan view thereof;

FIG. 7 is a front view of a second image thereof in a condition that the rollable display has been expanded by sliding;

FIG. 8 is a rear view of FIG. 7;

FIG. 9 is a left side view of FIG. 7;

FIG. 10 is a right side view of FIG. 7;

FIG. 11 is a top plan view of FIG. 7; and,

FIG. 12 is a bottom plan view of FIG. 7.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 and 7. The process or period in which one image transitions to another image forms no part of the claimed design.

The dash-dot broken lines showing a display screen portion define the bounds of the claim and form no part of the claimed design. The broken lines within the dash-dot rectangle depict portions of the display screen with transitional graphical user interface that form no part of the claimed design. All other broken lines show an electronic device and form no part of the claimed design.
