(57) **CLAIM**

The ornamental design for a head wearable light therapy device, as shown and described.

DESCRIPTION

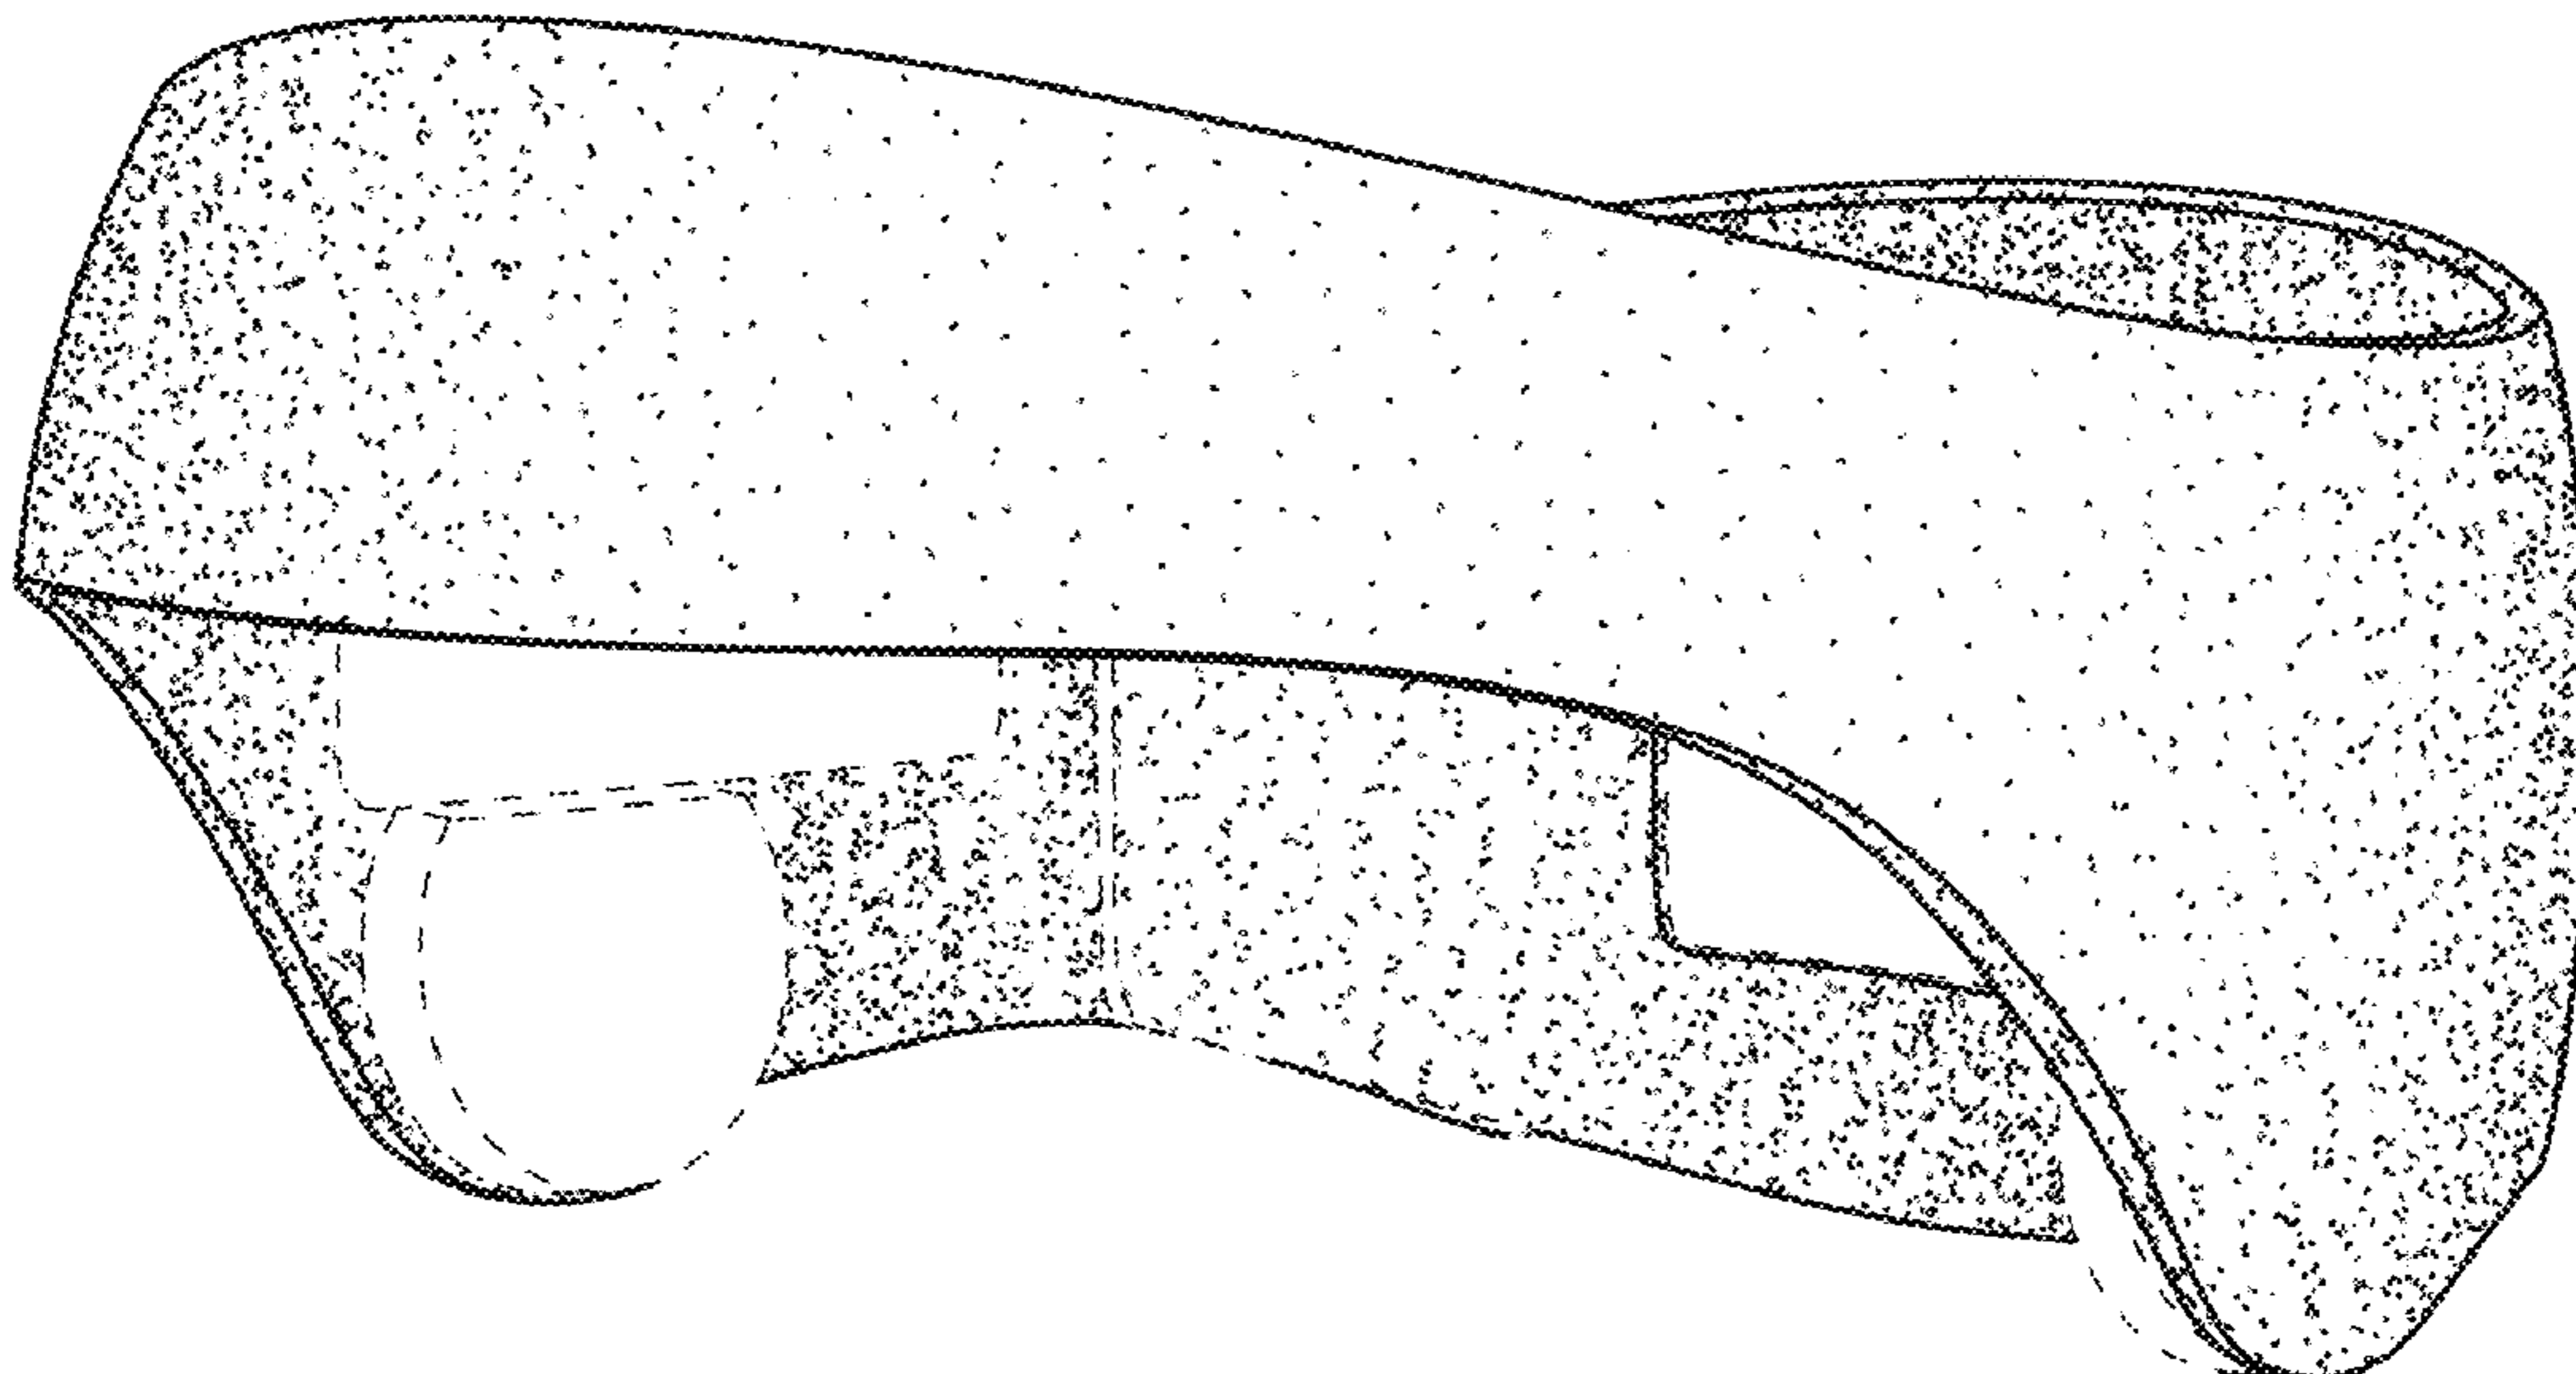

FIG. 1 is a perspective view of the head wearable light therapy device in accordance with the present invention. FIG. 2 is a front view of the head wearable light therapy device in accordance with the present invention. FIG. 3 is a rear perspective view of the head wearable light therapy device in accordance with the present invention. FIG. 4 is a left side view of the head wearable light therapy device in accordance with the present invention. FIG. 5 is a right side view of the head wearable light therapy device in accordance with the present invention; and, FIG. 6 is an elevated view of the head wearable light therapy device in accordance with the present invention. The broken lines illustrate portions of the head wearable light therapy device that form no part of the claimed design.
