CLAIM

The ornamental design for a display screen with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is the first image in a sequence of an animated graphical user interface showing our new design on a display screen according to a first embodiment;

FIG. 2 is the second image thereof;

FIG. 3 is the first image in a sequence of an animated graphical user interface showing our new design on a display screen according to a second embodiment;

FIG. 4 is the second image thereof;

FIG. 5 is the first image in a sequence of an animated graphical user interface showing our new design on a display screen according to a third embodiment; and,

FIG. 6 is the second image thereof.

In the first embodiment, the appearance of the animated user interface sequentially transitions between the images shown within FIGS. 1-2. In the second embodiment, the appearance of the animated user interface sequentially transitions between the images shown within FIGS. 3-4. And in the third embodiment, the appearance of the animated user interface sequentially transitions between the images shown within FIGS. 5-6.

The process or period in which an image sequence transitions from one image to another image forms no part of the claimed design.

The outermost broken lines illustrate an electronic device, which is the environment of the design and forms no part of the claim. The broken line showing of a display screen forms no part of the claimed design. The remaining broken lines illustrate a user interacting with the electronic device, and portions of the graphical user interface that form no part of the claimed design.
