

US00D951298S

(12) **United States Design Patent**  
**Mangum et al.**

(10) **Patent No.:** **US D951,298 S**

(45) **Date of Patent:** **\*\* \*May 10, 2022**

(54) **PANEL OF A VOICE INTERFACE DEVICE**

(71) Applicant: **Google LLC**, Mountain View, CA (US)

(72) Inventors: **Kristen Mangum**, San Mateo, CA (US); **Amy Martin**, San Francisco, CA (US); **Micah Collins**, Mountain View, CA (US); **Michael Sundermeyer**, Palo Alto, CA (US); **Jung Geun Tak**, Milbrae, CA (US)

(73) Assignee: **GOOGLE LLC**, Mountain View, CA (US)

(\*) Notice: This patent is subject to a terminal disclaimer.

(\*\*) Term: **15 Years**

(21) Appl. No.: **29/800,483**

(22) Filed: **Jul. 21, 2021**

**Related U.S. Application Data**

(63) Continuation of application No. 29/731,602, filed on Apr. 16, 2020, now Pat. No. Des. 927,550, which is a continuation of application No. 29/655,975, filed on Jul. 9, 2018, now Pat. No. Des. 885,436, which is a continuation of application No. 15/592,120, filed on May 10, 2017, now Pat. No. 10,304,450, application No. 29/800,483, which is a continuation of application No. 29/564,663, filed on May 13, 2016, now Pat. No. Des. 822,716.

(57) **CLAIM**

The ornamental design for a panel of a voice interface device, as shown and described.

**DESCRIPTION**

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application

publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front, left side perspective view of a panel of a voice interface device in a first, non-illuminated state showing our new design;

FIG. 2 is a front, left side perspective view of the panel of the voice interface device in a second, illuminated state;

FIG. 3 is a front elevational view of the panel of the voice interface device in the first, non-illuminated state;

FIG. 4 is a front elevational view of the panel of the voice interface device in the second, illuminated state;

FIG. 5 is a rear elevational view of the panel of the voice interface device;

FIG. 6 is a right-side elevational view of the panel of the voice interface device, the left-side elevational view being a mirror image of the right-side elevational view;

FIG. 7 is a top plan view of the panel of the voice interface device in the first, non-illuminated state;

FIG. 8 is a top plan view of the panel of the voice interface device in the second, illuminated state; and,

FIG. 9 is a bottom plan view of the panel of the voice interface device.

The broken lines depict environmental structure of the panel of the voice interface device that form no part of the claimed design.

The subject matter in this patent includes illuminated indicator lights, in color, of a panel of a voice interface device. The appearance of the transition from the first, non-illuminated state to the second, illuminated state is sequential from FIG. 1 to FIG. 2, from FIG. 3 to FIG. 4, and from FIG. 7 to FIG. 8. The process or period in which the panel of the voice interface device transitions from the first, non-illuminated state to the second, illuminated state forms no part of the claimed design. The transition can be in response to user interaction to cause the colored lights on the panel of the voice interface device to illuminate.
