(57) **CLAIM**

The ornamental design for a display screen or portion thereof with graphical user interface, as shown and described.

DESCRIPTION

FIG. **1** is a front view of a display screen or portion thereof with graphical user interface including a toolbar section at

the top portion of the graphical user interface, a schedule section at the upper left and upper central portions of the graphical user interface, a note section at the upper right portion of the graphical user interface, and a modular widget section at the lower portions of the graphical user interface according to the claimed design.

FIG. **2** is a rear view of the display screen or portion thereof with graphical user interface.

FIG. **3** is a left side view of the display screen or portion thereof with graphical user interface.

FIG. **4** is a right side view of the display screen or portion thereof with graphical user interface.

FIG. **5** is a top view of the display screen or portion thereof with graphical user interface; and,

FIG. **6** is a bottom view of the display screen or portion thereof with graphical user interface.

The inner dash-dot-dash broken-line rectangle in FIG. **1** shows the perimeter of a display screen and forms no part of the claimed design. The remaining dash-dot-dash broken lines in the figures show portions of an electronic device and form no part of the claimed design.

The dash-dash broken lines in FIG. **1** illustrate portions of the graphical user interface that form no part of the claimed design.

For purposes of clarity, the graphical user interface is shown as it would appear on the display screen and is used to display information and parameters for a medical imaging system, such as a Magnetic Resonance (MR) imaging system.
