(57) **CLAIM**

I claim the ornamental design for a display screen with an animated graphical interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of the first image in a transitional sequence for a display screen with an animated graphical interface, according to a first embodiment;
FIG. 2 is a front view of the second image in the transitional sequence according to the first embodiment;
FIG. 3 is a front view of the third image in the transitional sequence according to the first embodiment;
FIG. 4 is a front view of the fourth image in the transitional sequence according to the first embodiment;
FIG. 5 is a front view of the fifth image in the transitional sequence according to the first embodiment;
FIG. 6 is a front view of the sixth image in the transitional sequence according to the first embodiment;
FIG. 7 is a front view of the seventh image in the transitional sequence according to the first embodiment;
FIG. 8 is a front view of the eighth image in the transitional sequence according to the first embodiment;
FIG. 9 is a front view of the ninth image in the transitional sequence according to the first embodiment;
FIG. 10 is a front view of the tenth image in the transitional sequence according to the first embodiment;
FIG. 11 is a front view of the eleventh image in the transitional sequence according to the first embodiment;
FIG. 12 is a front view of the twelfth image in the transitional sequence according to the first embodiment;
FIG. 13 is a front view of the thirteenth image in the transitional sequence according to the first embodiment;
FIG. 14 is a front view of the first image in a transitional sequence for a display screen with an animated graphical interface, according to a second embodiment;
FIG. 15 is a front view of the second image in the transitional sequence according to the second embodiment;
FIG. 16 is a front view of the third image in the transitional sequence according to the second embodiment;
FIG. 17 is a front view of the fourth image in the transitional sequence according to the second embodiment;

(Continued)

FIG. 18 is a front view of the fifth image in the transitional sequence according to the second embodiment;
 FIG. 19 is a front view of the sixth image in the transitional sequence according to the second embodiment;
 FIG. 20 is a front view of the seventh image in the transitional sequence according to the second embodiment;
 FIG. 21 is a front view of the eighth image in the transitional sequence according to the second embodiment;
 FIG. 22 is a front view of the ninth image in the transitional sequence according to the second embodiment;
 FIG. 23 is a front view of the tenth image in the transitional sequence according to the second embodiment;
 FIG. 24 is a front view of the eleventh image in the transitional sequence according to the second embodiment;
 FIG. 25 is a front view of the twelfth image in the transitional sequence according to the second embodiment; and,
 FIG. 26 is a front view of the thirteenth image in the transitional sequence according to the second embodiment.
 The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 through 13 in the first embodiment and FIGS. 14 through 26 in the second embodiment.
 The outermost broken-line rectangle illustrates the perimeter of a display screen and forms no part of the claimed design. The remaining broken lines illustrate portions of an animated graphical interface that form no part of the claimed design.
 Areas of the design shown with a stipple fill illustrate a contrast in visual appearance.
