(57) **CLAIM**

(**) Term: **15 Years**

The ornamental design for a display screen or portion thereof with graphical user interface, as shown and described.

(21) Appl. No.: **29/818,670**

DESCRIPTION

(22) Filed: **Dec. 9, 2021**

The FIGURE is a front view of a display screen or portion thereof with graphical user interface according to the claimed design.

Related U.S. Application Data

(62) Division of application No. 29/671,083, filed on Nov. 21, 2018, now Pat. No. Des. 941,319.

See application file for complete search history.

The inner dash-dot-dash broken-line rectangle in the figure shows the perimeter of a display screen and forms no part of the claimed design. The outer dash-dot-dash broken lines show portions of an electronic device and form no part of the claimed design.

The dash-dash broken lines in the figure illustrate portions of a graphical user interface and form no part of the claimed design.

For purposes of clarity, the graphical user interface is shown as it would appear on the display screen and is used to display patient images and imaging settings of an imaging system, such as a Magnetic Resonance (MR) imaging system.
