(57) **CLAIM**

The ornamental design for a portion of a display screen with transitional graphical interface for guiding graphics, as shown and described.

**DESCRIPTION**

FIG. 1 is a first image in a sequence of a portion of a display screen with transitional graphical user interface for guiding graphics, showing our new design;

FIG. 2 is a second image in the sequence thereof;

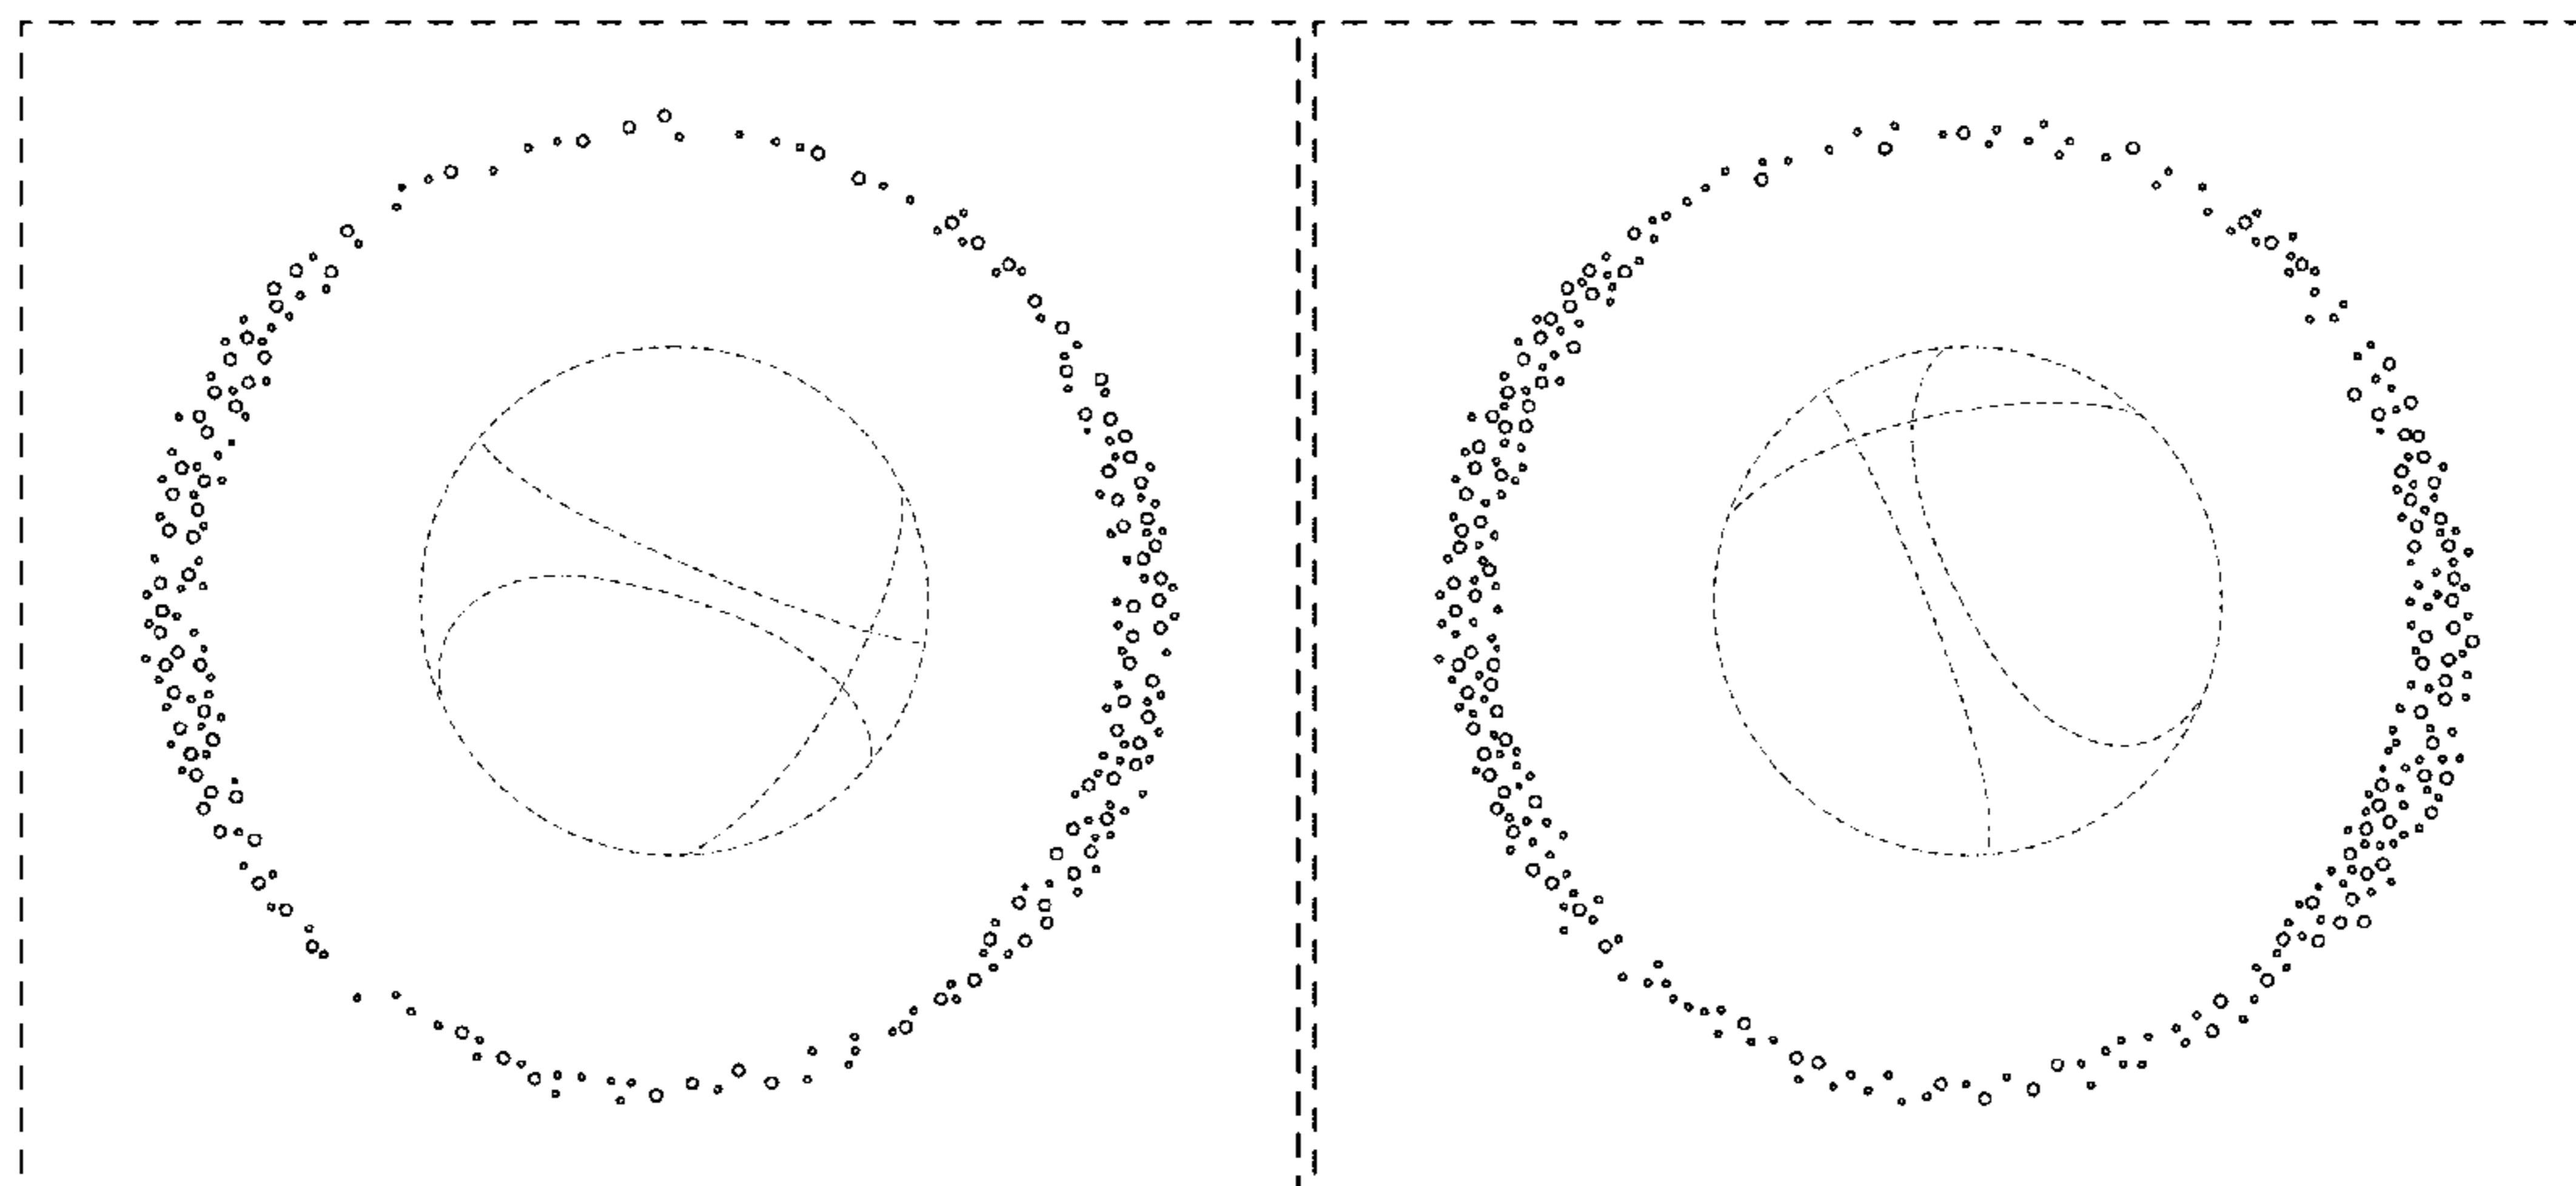

FIG. 3 is a third image in the sequence thereof; and,

FIG. 4 is a fourth image in the sequence thereof.

The outer perimeter shown in dashed broken lines in FIGS. 1-4 illustrates a portion of a display screen that forms no part of the claimed design. The dashed broken lines showing a sphere in FIGS. 1-4 show portions of the transitional graphical user interface and an outer boundary of the sphere, which forms no part of the claimed design. The dashed broken lines inside the outer boundary of the sphere depicted in FIGS. 1-4 show portions of the transitional graphical user interface and forms no part of the claimed design.

In the sequence, the appearance of the portion of a display screen with transitional graphical user interface for guiding graphics sequentially transitions between the images shown in FIGS. 1-4. The process or period in which one image transitions to another in the sequence forms no part of the claimed design.
