(57) **CLAIM**

The ornamental design for a display screen with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1. is a front view of a display screen with animated graphical user interface showing of our new design; FIG. 2 is an enlarged view taken from the area indicated by dot-dash boundary lines in FIG. 1, showing a first image in a sequence; FIG. 3 is a front view showing a second image thereof; and, FIG. 4 is a front view showing a third image thereof. The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 2-4. The process or period in which one image transitions to another image forms no part of the claimed design. The outer peripheral dash-dash broken lines illustrate a display screen or portion thereof and form no part of the claimed design. The remaining dash-dash broken lines illustrate portions of the graphical user interface that form no part of the claimed design. The dash-dot lead line labeled 2 indicates the area from which the enlargement in FIG. 2 is taken. The remaining dash-dot broken lines define the bounds of the claimed design and form no part thereof.

1 Claim, 4 Drawing Sheets
