(57) **CLAIM**

The ornamental design for an electronic video magnifier, as shown and described.

DESCRIPTION

FIG. 1 is a top perspective view of an electronic video magnifier according to the present design, wherein the magnifier is at an open position, the antenna is at a straight position, and the handle is at a closed position;

FIG. 2 is another top perspective view the electronic video magnifier of FIG. 1, wherein the magnifier is at an open position, the antenna is extended to a first direction (left), and the handle is at a closed position;

FIG. 3 is another top perspective view of the electronic video magnifier of FIG. 1, wherein the magnifier is at an open position, the antenna is extended to a second direction (right), and the handle is at a closed position;

FIG. 4 is another top perspective view of the electronic video magnifier of FIG. 1, wherein the magnifier is at a closed position, the antenna is at a closed position, and the handle is at a closed position;

FIG. 5 is another top perspective view of the electronic video magnifier of FIG. 1, wherein the magnifier is at a closed position, the antenna is at a closed position, and the handle is at an open position;

FIG. 6 is a top view of the electronic video magnifier of FIG. 4, wherein the magnifier is at a closed position, the antenna is at a closed position, and the handle is at a closed position;

FIG. 7 is a bottom view of the electronic video magnifier of FIG. 6;

FIG. 8 is a left view of the electronic video magnifier of FIG. 6;

(Continued)

FIG. 9 is a right view of the electronic video magnifier of FIG. 6;
 FIG. 10 is a rear view of the electronic video magnifier of FIG. 6;
 FIG. 11 is a front view of the electronic video magnifier of FIG. 6;
 FIG. 12 is a top view of the electronic video magnifier of FIG. 1, wherein the magnifier is at an open position, the antenna is at a straight position, and the handle is at a closed position;
 FIG. 13 is a bottom view of the electronic video magnifier of FIG. 12;
 FIG. 14 is a left view of the electronic video magnifier of FIG. 12;
 FIG. 15 is a right view of the electronic video magnifier of FIG. 12;
 FIG. 16 is a front view of the electronic video magnifier of FIG. 12; and,
 FIG. 17 is a rear view of the electronic video magnifier of FIG. 12.

The broken lines shown in the figures depict portions of the electronic video magnifier that form no part of the claimed design.
