(57) **CLAIM**

The ornamental design for a display screen with an animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence for a first embodiment of a display screen with an animated graphical user interface showing our new design; FIG. 2 is a second image thereof; and, FIG. 3 is a third image thereof.

The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1-3. The process or period in which one image transitions to another forms no part of the claimed design. The broken line at the periphery of the figures illustrate a display screen and the remaining broken lines illustrate portions of the animated graphical user interface. None of the broken lines form part of the claimed design.
