(57) **CLAIM**

The ornamental design for a heads-up display screen for automobile glass with image, as shown and described.

DESCRIPTION

FIG. 1 is a first image in a sequence of a heads-up display screen for automobile glass with image, showing our new design;

FIG. 2 is a second image thereof;

FIG. 3 is a third image thereof; and,

FIG. 4 is a fourth image thereof.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-4.

The process or period in which one image transitions to another image forms no part of the claimed design.

The images are displayed on the glass as a heads-up display. The broken lines shown in the drawings illustrate portions of a glass for automobiles that form no part of the claimed design.

The broken lines of uneven length show the boundary between the portions to be registered of a design patent as a partial design is pursued and the part that does not.

1 Claim, 4 Drawing Sheets
