(57) **CLAIM**

I claim the ornamental design for a vehicle with illuminable rearlight light sequence, as shown and described.

**DESCRIPTION**

The file of this patent contains at least one drawing /photograph executed in color. Copies of this patent with color drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is the first state in a sequence of a rear view of a vehicle with illuminable rearlight light sequence.

FIG. 2 is the second state thereof.

FIG. 3 is the third state thereof.

FIG. 4 is the fourth state thereof.

FIG. 5 is the fifth state thereof; and,

FIG. 6 is the sixth state thereof.

The appearance of the vehicle with illuminable rearlight light sequence sequentially transitions between the images shown in FIGS. 1-6.

The process or period in which one image transitions to another forms no part of the claimed design.

Each of FIGS. 1-6 is a rear view of the illuminable rearlight portions of the vehicle, surrounded by broken lines, with the rest of the vehicle shown in de-emphasized, reduced tonal value so as to illustrate environmental structure. The elements shown outside the broken lines form no part of the claimed design and are merely included to show environmental aspects thereof.

The broken lines shown in the drawings represent an unclaimed boundary and form no part of the claimed design.
