(57) **CLAIM**

The ornamental design for an electronic device with transi-
tional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of an electronic device with transi-
tional graphical user interface showing a first image in a
sequence, showing our new design in a state that the
electronic device is unfolded;

FIG. 2 is a front view showing a second image thereof,
shown in a state that the electronic device is rotated 90
degrees and partially folded inward;

FIG. 3 is a perspective view of FIG. 1;

FIG. 4 is a perspective view of FIG. 2;

FIG. 5 is a bottom view of FIG. 1; and,

FIG. 6 is a right-side view of FIG. 2.

The appearance of the transitional graphical user interface
sequentially transitions between the images shown in—
FIGS. 1-2. The process or period in which one image
transitions to another forms no part of the claimed design.

The outermost broken lines illustrating portions of an elec-
tronic device form no part of the claimed design. The
remainder of the broken lines illustrating portions of the
graphical user interface forms no part of the claimed design.
