(57) **CLAIM**

The ornamental design for an electronic device with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of an electronic device with transitional graphical user interface showing a first image in a sequence, showing our new design in a state that the electronic device is unfolded;

FIG. 2 is a front view showing a second image thereof, shown in a state that the electronic device is rotated 90 degrees and partially folded inward;

FIG. 3 is a perspective view of FIG. 1;

FIG. 4 is a perspective view of FIG. 2;

FIG. 5 is a bottom view of FIG. 1; and,

FIG. 6 is a right-side view of FIG. 2.

The appearance of the transitional graphical user interface sequentially transitions between the images shown in—FIGS. 1-2. The process or period in which one image transitions to another forms no part of the claimed design. The outermost broken lines illustrating portions of an electronic device form no part of the claimed design. The remainder of the broken lines illustrating portions of the graphical user interface forms no part of the claimed design.
