(57) **CLAIM**

The ornamental design of a display screen with surgical controller graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with surgical controller graphical user interface showing the new design; and, FIG. 2 is a perspective view of the display screen with surgical controller graphical user interface. The broken line showing of text, numbers and icons illustrate portions of the graphical user interface and the remaining broken lines illustrate an electronic device. None of the broken lines form part of the claimed design.
